## 1 INTRODUCTION

2

3 1. In the relevant civil complaint filed before, 24-CIV-07467<sup>1</sup> on the 24<sup>th</sup> of Nov 2024, the plaintiff

4 presented examples of avoidable cases of damages, or strikes, among others, by Meta platforms which

5 grind to halt, or sabotaged, among others, unique products, or services, or innovative academic

6 researches, or platforms, or causes, among others, built one person, research method, milestone,

7 project, activity, campaign and content, among others, at a time over the course of many years

8 instantly. In addition, in the subsequent response to the demurrer to the complaint<sup>2</sup>, the plaintiff, among

9 others, iterated, “Meta Platforms — which is headed by Mark Zuckerberg, CEO, and relevant

10 executives of Meta overseeing relevant operational matters then, including managing complaints

11 indirectly, among others — failed to avoid significant harms, or damages, strategically and

12 operationally, among others.” Moreover, the plaintiff, in the subsequent response to the demurrer to

13 the complaint, iterated, “He isn’t a lawyer by profession and that in the same way as he ventured on

14 taking authoritarianism against all the odds because most of his contemporaries who studied law and

15 politics, among others, would not want to fight for good governance, the pro-see litigant, putting his

16 heart and limited experience of law, would start a legal procedure after learning nearly all law firms

17 he contacted were not willing to represent any case against Meta Platforms. Furthermore, the plaintiff

18 iterated a) the defendant, or representative therof, ignored/disregarded most of the strategic,

19 outstanding, points, or harms, deciphered in the previous complaint, b) the unique, top-level, executive,

20 accountable, non-symbolic, powerful, direct and indirect, respective roles, operational decisions and

21 management and leadership tactics and strategies, among others, by Mark Zuckerberg, CEO and the

22 corresponding executive team of Meta, among other relevant persons making operational decisions

23 though it precluded how they shape the product, services, value propositions and value co-creation

24 spheres, among others, of Meta Platforms in B2C(business to customers), B2B(business to business),

25 B2G(business to government) and B2NG(business to non-government), among others, value-creation

26 spheres, among others, in detail or with examples, c) a software product is manufactured, or produced,

27 through commonly accepted software product manufacturing processes and methods, such as the

28 software development life cycle (SDLC)<sup>3</sup>, among others, upholding customary, normative, technology

methodologies, such as agile, among others, and that Meta’s AI software product, exhibiting a stored,

28 <sup>2</sup> Response to demurrer to the complaint filed on Nov 26, 2024. [www.chewata.org/rddc](http://www.chewata.org/rddc)

<sup>3</sup> Michael Argaw. The Product Management of Chewata, officially unpublished Msc thesis ([www.chewata.org/msc](http://www.chewata.org/msc))  
extracted from the case “Michael Argaw Vs Åbo Akademi University” filed in the district court of Turku, Finland on  
February 2025.

1 or computed, among others, property(or method)<sup>4</sup> of striking, or harming, or undermining, unique  
2 pages, or suppressing contents, or a product, or service, or vision, or causes, among others,  
3 discriminately, as demonstrated in sections A and G of the first complaint, under the category of  
4 product liability, a legal, or business, concept where manufacturers, or producers, of a software product  
5 would be liable for any damage, or loss, or harm, among others, caused by a defective software  
6 product, or application, or code, or service [whether intentionally, discriminately, to one party or  
7 because of professional negligence, or error, to multiple parties, among others.]. As a result, Meta's  
8 software product is expected to work impartially: "The lines of codes, or classes, or methods, or  
9 functions, among others, which form Meta's software product, or AI, as we may know and see it, must  
10 not discriminate similar contents time and again, d) unfair business practices by Meta, such as refusing  
11 to take down dangerous, abusive and violent, among others, contents [in some cases contents  
12 psychologically abusive and socially damaging to the plaintiff] though informed, among others, while  
13 disabling, or undermining, a unique page, or product, or service, or community, or political-power,  
14 among others, built one person, research method, milestone, project, activity, campaign and content,  
15 among others, at a time over the course of many years instantly by striking legit contents  
16 discriminately, e) Meta violated the civil, human and democratic rights of the plaintiff and millions of  
17 people represented by the unique, afflicted-citizens-centered, product, among others services rendered  
18 directly and indirectly, f) acts of professional negligence: "from the internal, organizational,  
19 representatives of Meta Platforms through fact checkers to the oversight board, conducts of  
20 professional negligence of failing to ensure the product, or services, of Meta platforms work  
21 impartially, or ethically, without bringing avoidable, significant, damages, were cited. For instance,  
22 when informed about unethical, or harmful, operational conducts, such as striking a legit content  
23 illegally, or refusing to take down violent, dangerous and abusive contents doing away with  
24 fundamental, normative, universal principles, Meta failed to uphold normative, professional and  
25 ethical business, or service delivery, processes and enterprise governance<sup>5</sup>(including architecture,  
26 among others) and customer-centricisime models, among others, less predisposed to causing critical  
27 damages time and again, g) the illegal, or unethical, strikes, suppressions, neglects and disparagements,  
among others, by Meta Platforms damaged the unique, innovative, first of its kind, scientific and

28

<sup>5</sup> What is enterprise governance? <https://insterp.com/what-is-enterprise-governance/>

1       afflicted-customer-centric software product management research of Michael Argaw<sup>6</sup> <sup>7</sup>, h) and, last  
2       but not least, Meta Platforms allowed several entities to defame, disparage and destroy Michael Argaw  
3       socially and politically, among others, time and again.

4       2. In this civil complaint, the plaintiff would like to iterate the following golden, normative, principles  
5       once and for the last time: “Can we imagine seconds, minutes, days, weeks, months and years where  
6       the service operations of Meta Platforms are interrupted, or significantly jeopardized, impeding the  
7       growth of Meta Platforms fundamentally in the real-time and prescriptively? Can we imagine a  
8       scenario where Facebook — Meta platforms’ most powerful social networking innovation which  
9       connects, powers and empowers billions of users across the globe<sup>8</sup>, serving as an indispensable option  
10      for doing business, networking with friends and families, entertainment, evangelization and  
11      fellowship, social education, citizen journalism and the steadfast promotion of human and democratic  
12      rights, among others — get disconnected, or isolated, from its users, or customers, instantly? Will the  
13      CEO, or the executive team of Meta Platforms, or Meta Platforms dependent(powered) pro-democracy  
14      activists, or opposition politicians in exile, or founders of popular games, or afflicted-citizens-  
15      centered-software-product-researchers, like me trying to promote democracy harnessing Facebook, or  
16      innovative digital products, or new innovative research methods, or citizen journalism, or creatives,  
17      among others, allow disruptions, undermination and exponential decline, among others, of the services  
18      of Meta Platforms. Not at all. Because, the CEO, the executive team and substantive users of Meta  
19      Platforms like myself — though we all are not perfect, may not have perfect partners, may not know,  
20      or are not experts in, everything and are not proposing our service offerings(which for scientific  
21      researcher, or scientist, and multidisciplinary product, political, social, service and fine art, among  
22      others, visionary Michael is liberating millions out of the bondage of tyranny and social  
23      entrepreneurship, among others) in a perfectly operating world — are there to make sure the products,  
24      or services, of Meta Platforms, such as Facebook and WhatsApp, among others, keep growing to the  
25      next level holistically without any disruption, decline and distress, among others, to any stakeholder

---

26       <sup>6</sup> Michael Argaw. The Product Management of Chewata, officially unpublished(supressed) Msc thesis  
27       ([www.chewata.org/msc](http://www.chewata.org/msc)) extracted from the case “Michael Argaw Vs Åbo Akademi University: Urgent legal operation  
28       — against the systematic suppression, discrimination and neglect, among other violations of human and democratic rights  
29       by Åbo Akademi University which is represented by its faculty — to protect a scientific research work advocating for the  
30       human and democratic rights of millions of Ethiopians while showing how software product management, or empirical  
31       software engineering, can be harnessed to understand and solve the political problems of millions of afflicted customers(or  
32       citizens) innovatively ([www.chewata.org/mvsa.pdf](http://www.chewata.org/mvsa.pdf))” filed in the district court of Turku, Finland on February 2025.

33       <sup>7</sup> Example cases: page 14-16. Michael Argaw Vs Åbo Akademi University: Urgent legal operation:  
34       [www.chewata.org/mvsa.pdf](http://www.chewata.org/mvsa.pdf)

35       <sup>8</sup> Statista. Leading countries based on Facebook audience size as of April 2024 (August. 18, 2024),  
36       <https://www.statista.com/statistics/268136/top-15-countries-based-on-number-of-facebook-users/#:~:text=Facebook%20%E2%80%93%20the%20most%20used%20social%20media&text=As%20of%20the%20third%20quarter,most%20popular%20social%20media%20worldwide>.

1 for seconds, minutes, days, fortnights, quarters and years. Imagine the corresponding emotional  
2 distress, negative feelings and hurts, churn of users and followers and loss of expected exponential  
3 impact, investments, growth, brand image, vested equity and organizational infrastructure, among  
4 other damages, which will be incurred and experienced in a scenario where the Facebook product, the  
5 production, management and exponential growth of which is architected by its CEO, among others,  
6 ceases to function normally unprecedently! Will the CEO, among others, of Meta Platforms, among  
7 others, allow, or keep quiet for months and years in the face of, acts disparaging, disrupting, impeding  
8 and undermining products, or services, they worked hard to raise up for over a decade? If I, for sure,  
9 can not say he will not, I firmly believe Mark Zuckerberg, among others, will do something when  
10 something disrupts the platforms, pages, services and product lines they built ground up over the course  
11 of nearly two decades of time. What if discriminatory(targeting an individual, or page, or product,  
12 research, or opinion, among others), or unfair, business practices, or professional negligence, among  
13 others, violating the normative terms of services of Meta, or Facebook, result in abrupt disruption of  
14 services to pages which, defying the state of emergency[at all cost] of regimes, represented the voices  
15 of over 100 million Ethiopians fervently. Isn't it the strategic role of the CEO and executives, among  
16 others, of Meta Platforms that respecting civil, or human and democratic, rights, ensuring the products,  
17 or services, of Meta work fairly and impartially, upholding community guidelines and normativism,  
18 deploying ethical, professional, standards of duty of care, among others, without causing any damage  
19 to private, public and non-governmental interests intrinsically, such as defamation, disparagement,  
20 emotional-distress and political, financial, social and cultural, among other, losses causing jeopardy  
21 and significant decline of a product, or service, or research, or vision and cause, among others. If the  
22 CEO of Meta Platforms, among others, are not responsible, or accountable, for the product,  
23 operational, customer service, technological, governance, financial and legal, among others, strategies  
24 they approve, oversee and reformulate, among others, who else has a de facto, strategic, executive  
25 leadership capacity and responsibility, among others, to ensure emotional distress, disparagement, loss  
26 of growth and the systemic suppression of the voice and democratic aspirations of millions of people,  
27 and entities, among others, will not happen by suppressing, undermining, jeopardizing, impeding and  
be discussed refreshingly, and in detail, in section A of the substantive allegations subsequently]?"

1       3. In addition, in this complaint, the plaintiff will add more substantive allegations: “a) detailed account  
2       on how Meta Platforms allowed several entities to defame, disparage and destroy, among others,  
3       Michael Argaw socially and politically, among others, b) Meta Platforms disregarded the plaintiff’s  
4       legitimate complaint regarding outright discriminations reported, c) Meta Platforms prevented the  
5       edition of an influential live fiction [content] in the making impressing million times<sup>9</sup>, d) Meta  
6       Platforms intercepted an ongoing, emotional, promotion of a post, or content, criticising the mis-  
7       informative, value-distractive, conduct of Egypt doing away with a must have, honest, respectful,  
8       sovereign-equal and value co-creative cooperation premised on equitability<sup>10 11</sup> along the Nile, e)  
9       impeding the uninterrupted, holistic, growth and promotion of an idea strategically, Meta Platforms  
10      failed to process a legit ID uploaded to be able to continue running political, social and economic  
11      oriented creatives(ads) in the jurisdiction envisaged, f) and Meta Platforms prevented ads released  
12      from the social entrepreneurship education platform, EntreprenuersinFinland<sup>12</sup>, for unknown reasons,  
13      impeding the corresponding growth of the page, or product, or service, among others, strategically,  
14      among others.

15      4. Moreover, in this complaint, the plaintiff will discuss how a) the corresponding wrong strikes, b)  
16      product, or service, failures, c) discriminations, d) civil, human and democratic rights violations, e) in  
17      what could be, “a failure, or indifference, in the strategic management of an enterprise architecture, or  
18      governance system,” which, deviating from the common, universal, expressly-stated, fundamental and  
19      bi-partisan, among others, mission, values and vision, among others, of Meta Platforms, allowed open  
20      and multi-dimensional, among others, public defamations and attacks on Michael Argaw strategically  
21      time and again directly and indirectly, f) wrong and discriminate interferences on Facebook ads, g) the  
22      delayed and intercepted processing of the corresponding ID required to be able to run creatives on  
23      political, social and economic issues, h) indifference to corresponding timely by Meta Platforms  
24      caused high-level damages in concreate social, political, financial, academic and economical, among

25      9 An influential live-fiction in the making, Dr Zete or Dr Zetenaw(which acculturated to English in short means ‘Dr  
26      Health’), is set on cadres and opponents of a fictitious regime and the interaction thereof in different spheres.

27      10 Although Abay river, or the Blue Nile, which flows out from the highlands of Ethiopia won’t become an international  
28      water [technically] before it crosses the border of a second country, or sovereign jurisdiction, upholding equitability  
29      with an assumption the riparian countries have equity over the water is the optimum way to move forward. Kent law has  
30      detailed technical literature regarding equitability and equity, among others. <https://studentorgs.kentlaw.iit.edu/jicl/wp-content/uploads/sites/5/2014/01/Margaret-J.-Vick-The-Law-of-International-Waters.pdf>

31      11 The Helsinki rules on equitability. <https://www.tandfonline.com/doi/full/10.1080/07900620701488562?src=recsys>

32      12 Garnering over 2000 visitors per day, EntreprenuersinFinland was a crowd entrepreneurship education platform which  
33      served as an alternative, open, online and educational platform for entrepreneurship couple of years.

1 others, terms, or metrics, holistically and strategically, i) and Meta's product chemistry<sup>13</sup>, among  
2 others.

3  
4 5. Consequently, I — Michael Mulate Argaw, the plaintiff and representative of 1) "Chewata" as  
"Chewata ኔብጥ" 2) "Michael Argaw" as "ማካኤል አርጋው" 3) "ሪ/ር ኮሙናው የለልች" as "ሪ/ር ኮሙናው  
5 የለልች" and 4) "Notacit" as "Notacit" which enjoy well over 74K,11K, 5.3K and 6.5K followers  
6 respectively, continuing on, or supplementing, a relevant civil complaint filed before, 24-CIV-07467<sup>14</sup>  
7 — am filing the following substantive allegations here with to take a legal action regarding  
8 discriminatory strikes, or actions, among others, which sabotaged and undermined the exponential  
9 growth, impact, public image and service delivery, among others, of the accounts, or pages, or services,  
10 or corresponding products, or portfolios, or innovative scientific research<sup>15</sup>, among others, directly and  
indirectly.

## **SUBSTANTIVE ALLEGATIONS**

***A. Detailed substantive allegation on how Meta Platforms allowed several entities to defame, disparage and destroy Michael Argaw socially and politically, among others.***

6. Example of deliberate, mis-informative, fictions, or value-destinations, carried out on Michael Argaw publicly<sup>16</sup>

Figure 1: An open, false, insult, disparagement, against Michael on Facebook

7. In the post above, according to Figure 1, Amarawitu Amara(Menen Hailemariam), a Facebook influencer followed by tenth of thousands, if not over 100K, made a deceitful libel, or defamation, or disparagement, or mis-information, or hybrid-warfare, against Michael Argaw. “Michael. Even that prostitute breeding mother of yours will not be left. I will take on her as well tomorrow. Calling names ... I will get you to bleed blood. Michael, you are sticking with old white ladies,” said Amarawitu Amara(Menen Hailemariam). Everything Amarawitu said is false. There is not any single word which is a) right, b) true and c) permissible for public disclosure regarding the personal meta data(information) of Michael Argaw in anyways or by any means. While there is not any doubt Meta

<sup>16</sup> Michael Argaw. Meta Platforms allowed heinous value destructions aimed at destroying Michael strategically: "For instance, deliberate, mis-informative, defamations, or attacks, or fictions, on Michael Argaw". (November. 24, 2024), <https://drive.google.com/drive/folders/1IK4cR-WjrF81Qb9YARAxBkhWZs82Y1-k?usp=sharing>

1 platforms did not write on the abusive, value-destructive, superstitious and preposterous content  
2 violating the human and democratic rights of Michael, the management tactics and strategies deployed  
3 by its leadership, which is entrusted to ensure no, or the least possible, harm would occur to members  
4 of the community, allowed Amarawitu Amara(Menen Hailemariam), among others, to carry out hybrid  
5 warfare, or deceitful libels, or defamations, or disparagements, or mis-informations, against Michael  
6 Argaw persistently or time and again.

18 Figure 2: Another open, false, insult, disparagement, against Michael on Facebook  
19

20 8. Depicted in figure 2 is yet another abusive violation of the community guidelines of Facebook against  
21 Michael. While there is not any doubt Meta platforms did not write the civil, human and democratic  
22 rights violating content above, the irresponsible management tactics and strategy deployed by its  
23 leadership, which is entrusted to ensure no, or the least possible, harm would occur to members of the  
24 community, allowed Amarawitu Amara(Menen Hailemariam), among others, to carry out hybrid  
25 warfare, or deceitful libels, or defamations, or disparagements, or mis-informations, among others,  
26 against Michael Argaw persistently or time and again.

 **አማራዊት አማራዊት መለ** August 29 at 8:24 PM · 

Never seen a man like you who is seeking attention at this level and so desperate to promote himself in a whacky way though you have absolutely nothing to offer. Finally please don't ever worship your fake 'qualification' as anyone can forge it at anytime. 😂😂😂😂

**MIkael Arage** updated his profile picture. · 6 hrs · 

The multidimensional investigation continues all the more. ከተተለ ይቀጥለል!  
"And – at **Chewata ተወቃቻ** – we profile, respond, run after, frame, investigate and monitor covertly and overtly," said the covert Human Rights Officer in the middle.

Figure 3: Continued: another open, false, insult, disparagement, against Michael on Facebook

9. In the post above, according to figure 3, Michael is pausing for a moment of picture with the conscripts of the defence forces of Finland. In addition, Michael tells what he also does with Chewata: "That he has a unique role: Human Rights Officer" It is evident, no matter how anyone would want to interpret his role, promoting civil, human and democratic rights, win-win preferential option for good governance and social justice, among others, the post does not mention anything against Amarawit

1 Wello(Menen Hailemariam) in any ways, or by any means, intrinsically. Nonetheless, Amarawit  
2 Wello(Menen Hailemariam) would engage in making a deceitful libel, or defamation, or  
3 disparagement, or mis-information, against Michael Argaw. While there is not any doubt Meta  
4 platforms did not write the civil, human and democratic, rights violating content above, the  
5 irresponsible management tactics and strategy deployed by its leadership, which is entrusted to ensure  
6 no, or the least possible, harm would occur to a member of the community time and again, allowed  
Amarawitu Amara(Menen Hailemariam), among others, to carry out hybrid warfares, or deceitful  
libels, or defamations, or disparagements, or mis-informations, against Michael Argaw time and again.

28 Figure 4: Continued: another open, false, insult, disparagement, against Michael on Facebook

1 10. In the post above, according to Figure 4, Haileyesus Adamu, attaching a publicly recognizable picture  
2 of Michael Argaw taken from one of his posts on Facebook, wrote an objectionable, defamatory,  
3 fiction, or libel, or disparagement, against Michael Argaw. “This is Mikael Aragey. Claiming he has  
4 families in Wello, he has been cheating money. He is from the Tigre tribe. He claims he is professor,  
5 engineer, Tegabru Gobeze. He has a Tigre account by the name Semay Giratu. He claims to be Kimant  
6 as well. He has also got an Oromo account. I have attached all his accounts here with. We had him in  
7 our camp by mistake, and he would register the name and logo of our organization in Finland and  
8 attempt to cheat others by claiming our organization belonged to him falsely. They say he is crazy. He  
9 is a Tigre prostitute. He is using the aforementioned accounts to insult Anegu, among others. He is a  
10 dirty Tigre,” said Adamu unabridged. Facts of the matter: “A) Never did Michael register, or  
11 incorporate, entities, or organizations, stealing brand and logo name from the organization of Adamu.  
12 As a result, aimed at destroying Michael politically, socially and commercially, among others,  
13 unequivocally, Adamu made a false, abusive, allegation, libel, disparagement, defamation, against  
14 Michael Argaw to hundreds of thousands of followers. Moreover, Michael Argaw did not engage in  
15 any organized political activity in the camp to which Adamu belongs. It is evident that in order for  
16 Adamu to make any sort of claim, or defamation, or character assassination, against Michael, he  
17 contrived a casualty, or relation, or association, such as “having had an experience of operating in the  
18 same organization, or camp” with the victim of abuse, Michael Argaw. B) Michael does not belong to  
19 both the Tigre and Kimant tribes, or clans, of Ethiopia though Adamu alleged. Nor has he ever made  
20 any claim he belongs to any of the tribes for any purpose in anyways or by any means. C) Nor Michael  
21 received(or collected) any money from anybody regarding, or in the name of, any entity(person, family  
22 and relative, among others) in the world. D) Nor possessed, or owned, the Facebook accounts alleged  
23 by Adamu. Nor does he have any Oromo account. Nor does he know, or ever heard about, the accounts  
24 before the public libel, or defamation, in connection with. E) Michael has never made a claim he is  
25 professor, engineer, Tegabru Gobeze in any ways or by any means. F) Michael is not crazy as well.  
26 Instead, he is a strong, fearless, fervent and good hearted man who, against all the odds, ventured on  
27 doing what 99.999999999% of his contemporaries, or piers, are not willing to sacrifice their precious  
28 youthhood in self-denial for: “Fervently putting his time, effort, money and skill, among others, to  
fight for, and liberate, millions out of the bondage of the exploitations and oppressions of one of the  
most ruthless, superstitious and preposterous tyranny in the world, he passed his youthhood in the  
service of others doing what nearly all aren’t willing to sacrifice their time even for an hour.” G) Right  
next to Michael’s picture is the picture of a police officer whom Adamu introduced as Amare Giuesh.  
“Amare Giuesh claims to be Wolleye. Nonetheless, he is a dirty Tigre who claims to be Wolleye. As  
a police commander in Wello, Amare Giuesh assassinated several Amhara youths in Wello,” said  
Adamu. Michael has not met [nor does he know] the police officer. As a matter of fact, Michael learned  
about the alleged officer only after reading Adamu’s post. Advocating for the human and democratic

1 rights of the nations and nationalities of Ethiopia, such as the people of Amhara, Oromo, South  
2 Ethiopia, Afar and Tigray, among others, in general, and the issues of the people of Amhara and the  
3 residents of Addis Abeba in particular [a] that Addis Abebians have yet got to exercise the right to  
4 self-administration, b) and Addis Abeba — though having a population, economy and concentration  
5 of elites, among others, surpassing some regions in Ethiopia — has yet got to be represented in the  
6 federal parliament of Ethiopia equitably with an estimated seat ranging from 70 to 200], Michael  
7 Argaw is a pro-democracy campaigners, or one of the few genuine opponents of the regime in Ethiopia,  
8 who executed games, scientific researches, digital campaigns, ads, citizen journalisms, scribblings and  
9 historical interpretations, among others, shaping contemporary politics in Ethiopia, promoting an end  
10 to tyranny, the promotion of free and fair periodic elections, peaceful transition to democracy through  
11 a product, research, service, idea, philosophie, updates and opinions, among others, aimed at advancing  
12 democracy, economy, development and constructive interpretation of history, among others.  
13 Nonetheless, Adamu — as part and parcel of his hybrid strategy, mis-categorizing Michael along with  
14 the operatives of the regime superstitiously deliberately — would campaign against Michael  
15 deceitfully. Subsequently, there is not any doubt Meta Platforms is not liable for the conduct of the  
16 users of the platforms. Nevertheless, Meta platforms could have avoided repeated and avoidable  
17 harms, or damages, to Michael and his social, technological academic and multidisciplinary, among  
18 others, standings, among others, by 1) taking down illegal contents swiftly and 2) making sure  
19 individuals who pose a threat to the safety, security and well-being of others, or products, or services,  
20 among others, in any ways, or by any means, will not get any chance for abusing persons and services,  
21 among others, fixed on bringing freedom, democracy, good governance and economic empowerment,  
22 among others, to millions of Ethiopians applying multidisciplinary, scientific, research-methods,  
23 innovation, technology, marketing, art and culture, among others, disrupting politics orthogonally. As  
24 a result, as opposed to being innocent until proven guilty, Michael has been set to be guilty until proven  
25 innocent due to the defamations he faced, a default status which is not attached to any legal entity, just  
26 because Meta allowed intensive and extensive disparagement, or libel, against Michael from different  
27 parties unethically. Adamu has been attacking several individuals, such as artist Teddy Afro, among  
28 others. Again, if Meta platforms, which did not co-create the posts with Adamu, took decisive actions  
on Adamu, such as striking the contents in due time, the exponential damages on Michael, among  
others, could have been avoided in due time. Ensuring from the oversight board, software architecture  
and customer service through public relation, product management and service operations to research  
and development, human resources and finances, among others, is running ethically, the [strategically  
important] role of the CEO of Meta platforms is the highest responsibility within the organization  
focused on maintaining the safety, security and wellbeing of human beings responsibly. From product  
development and terms of services through customer service and enterprise governance to managing  
culture, technology and business, among others, the service, or safety and security, of the individual

1 person takes, or must take, the center stage when it comes to the regularly vetted and refined  
2 responsibilities of the CEO and executive team, among others, of one of the leading people-centered,  
3 people-centric, personal-branding, democracy-empowering, personal-building and product-led  
4 organization<sup>17</sup>, among others, on earth — Meta Platforms, the leading message placement and  
5 positioning entity on earth, according to the subjective opinion of the plaintiff. Subsequently, Meta's  
6 content qualification and oversight team — which is managed by the strategic team of Meta directly  
7 or indirectly, which is headed by Zuckerberg — was negligent, or complicit, or indifferent, in the face  
8 of repeated violations of Meta's guidelines, or mission, vision and values, or civil, human and  
9 democratic, rights, on Michael. As a CEO and members of the executive team leading one of the most  
10 people-centered and product-led tech organization on earth, it is incumbent upon Mark Zuckerberg,  
11 among others, no person(whether one of the few contemporary political philosopher opposing the  
12 regime, advancing change in a unique way relentlessly, among others, or the only one who was running  
13 ads by the time when the state of emergency declared by the regime paralysed few of the opposing  
14 voices), or product, or research<sup>18</sup>, or service, or cause, or country, among others, get harmed time and  
15 again violently. Mistakes can happen because we aren't living in a perfect operational environment. If  
16 false, base-less, attacks, or jeopardy, unfold on one person, or product, or service, among others, time  
17 and again, whether or Meta is aware of it, coupled with other substantive allegations, or jeopardy,  
18 raises a big question mark regarding Meta's value, mission and vision strategically. Because, Meta is  
a building, or value proposition, platform where as opposed to powering distraction, distortion and  
demolition, among others, scientific research methods, persons, services, products, causes, democratic  
ideals, causes and powerful stories, among others, are built pivoting to and converting one person at  
a time over a course of many years through hard research and development activities spanning years  
of time.

25 <sup>17</sup> Todd Olson. The Product-led Organization. <https://www.pendo.io/product-led/the-product-led-organization/>

26 <sup>18</sup> Michael Argaw. The Product Management of Chewata, officially unpublished(supressed) Msc thesis  
([www.chewata.org/msc](http://www.chewata.org/msc)) extracted from the case “Michael Argaw Vs Åbo Akademi University: Urgent legal operation  
— against the systematic suppression, discrimination and neglect, among other violations of human and democratic rights  
by Åbo Akademi University which is represented by its faculty — to protect a scientific research work advocating for the  
human and democratic rights of millions of Ethiopians while showing how software product management, or empirical  
software engineering, can be harnessed to understand and solve the problems of afflicted customers innovatively  
([www.chewata.org/mvsa.pdf](http://www.chewata.org/mvsa.pdf))” filed in the district court of Turku, Finland on February 2025.

18 Figure 5: Continued: open incitement, insult, disparagement, against Michael on Facebook  
19

20 11. In the post above, according to figure 5, are three different pictures of which copyright belongs to  
21 Michael: “a) the picture on the top represents a social media, social movement, campaign regarding  
22 the struggle of the people of Amhara against the EPRDF regime, b) the picture in the lower-left  
23 represents a social media, social movement, campaign regarding the Oromo protest which engulfed  
24 cities across the Oromia region of Ethiopia in the run up to 2018, and c) the picture in the lower-right  
25 was taken when Michael visited Venice, Italy, as a tourist” Nonetheless, Ghion Amhara would make  
26 a deceitful libel, or incitement for attack, or violence, or defamation, or disparagement, or mis-  
27 information, against Michael Argaw: “Nobody knows who is behind this flea opening his mouth  
28 against the people of Amhara. He is untieing his open mouth. You must do something against him.  
Tell the flea that using his remaining time(albeit after wasting most of his times with Finnish Chicks)  
to attack the people of Amhara will cost him dearly” Facts of the matter: “Again, everything written

1 by the poster, who was dehumanizing and inciting violence against Michael on top of the deceitful  
2 libels, or defamations, or disparagements, or mis-informations, or hybridwarfares, against Michael  
3 openly, is false, wrong and deceitful, among others”

4 12. While it allowed the relentless, abusive, misinformations, hybrid warfares and indoctrinations, among  
5 others, of the regime in Ethiopia<sup>19</sup> <sup>20</sup> and its cadres on the exploited and oppressed people of Ethiopia,  
6 among others, persistently, Meta Platforms did not only allow, or enable, the deliberate value  
7 destruction of the key, few, opponents of the regime like Michael Argaw and his services but also  
8 carried out systemic suppression on ideas(or value propositions), or an innovative product, or scientific  
9 research, or contents, among others, exposing, and advocating against, tyranny while advancing  
democracy orthogonally.

21 Figure 6: Instance of Meta disregarding outstanding issues presented by the customer.

22 Hi ወካክለኛ , thank you for contacting Meta Pro Team! My name is Joe and I'm glad  
23 to help. I'll be assisting you on your inquiry about ad account issue.  
24 Kindly take note of your Reference ID: 509639210926771  
25 Before we proceed, can you confirm if 124957439345739 is the best phone  
26 number to reach you so I can contact you in case we get disconnected?  
Also, may I have an alternate contact number too? I'd like to make sure I can  
continue assisting you in case our chat gets disconnected. This is to help ensure  
that we can still reach out so that your concern is properly resolved.

27 Figure 7: Instance of Meta deflecting over an outstanding issue presented by the customer.

February 2025. Page 1-4.

<sup>22</sup> Customer relation. HubSpot. <https://blog.hubspot.com/service/customer-relations#what-is-customer-relations>

1 **C. Meta Platforms disregarded the plaintiff's legitimate complaint regarding his**  
2 **difficulty merging two pages by claiming “the pages are merged” falsely.**

4       13. Although informed about the plaintiff's difficulty of merging two related pages then under Job ID  
5       1331531981025402, Meta Platforms disregarded the plaintiff's legitimate complaint by claiming “the pages  
6       are merged” falsely, violating normative, professional and customer-centric standards fundamentally,  
7       delivering implausibly care-less service deliberately consciously.

8       Other Page issue | Job: 1331531981025402                                <img alt="lock icon" data-bbox="8138 292 8151

1 **D. Meta Platforms prevented the edition of an influential live fiction content in  
2 the making impressing millions times**

3 14. Impeding its corresponding exponential growth, or democratic cause, or envisaged social, political and  
4 cultural, among others, impact, or the strategic, high-level, objectives, among others, of the brand  
5 negatively, Meta Platforms prevented the edition of a well-pivoted, validated, growing and influential  
6 live-fiction which garnered over 17K likes<sup>23</sup>. In addition, by forcing a public disclosure, Meta  
7 Platforms — an entity of which mission, vision and values doesn't preclude promoting human and  
8 democratic rights while protecting those who put themselves in the front line to advance causes of  
9 democracy — jeopardized an imperative private interest of security, or anonymity, among others,  
10 strategically when, or because, there, apparently, arised a need for making public complaints or  
11 disclosures. In the picture below, it is evident it is not possible to edit through the ongoing work of  
12 fiction in the making. Furthermore, the video link here with referenced shows the last time when the  
13 corresponding content was edited, when it was permissible to edit and the duration of time the right to  
14 edit the fiction was prevented indirectly<sup>24</sup>. Again, by impeding the unique, impactful, politico-cultural,  
15 among others, service<sup>25</sup>, or fiction, touching from corruption through rape to authoritarianism, among  
16 others, Meta Platforms interfered in the high-level, politico-cultural and politico-economical, among  
others, arena of Ethiopian politics negatively by controlling the legit, democratic, causes, propagations  
and indoctrinations, among others, promoted, or contemplated, in the corresponding trending, very  
impactful, post, or page, or brand, strategically intrinsically unfairly.

17 15. Damages arising from suppression, or obstruction, of civil, human and democratic rights: "For every  
18 day, or year, the work of fine art in the making get impeded, the envisaged, strategic, high-level,  
19 politico-cultural, impacts, or objectives, hypothesized through the fiction directed, among other  
20 exponential brand value propositions and developments in the making, get jeopardized strategically  
21 unequivocally."

22  
23  
24 <sup>23</sup> If not the most, one of the most influential live work of fine art to be written in the history of contemporary Ethiopian  
25 politics, has been impeded by Meta for years. For every day, or year, the work is impeded, the envisaged politico-  
cultural impacts, or objectives, hypothesized through the directed fiction in the making get jeopardized.  
[https://www.facebook.com/permalink.php?story\\_fbid=pfbid02YAJannQNUF5LxLLRe7orm1QRgQxnvCYwD16ACzuJNzKWtCZsex7py6AvikkNprSel&id=100066855699762](https://www.facebook.com/permalink.php?story_fbid=pfbid02YAJannQNUF5LxLLRe7orm1QRgQxnvCYwD16ACzuJNzKWtCZsex7py6AvikkNprSel&id=100066855699762)

26 <sup>24</sup> A video showing the history of edition of the fiction in the making. <https://youtu.be/GAshGuzC908>

27 <sup>25</sup> If not the most since record began, one of the most influential live work of fine art to be written in the history of  
contemporary Ethiopian politics, has been impeded by Meta for years.

[https://www.facebook.com/permalink.php?story\\_fbid=pfbid02YAJannQNUF5LxLLRe7orm1QRgQxnvCYwD16ACzuJNzKWtCZsex7py6AvikkNprSel&id=100066855699762](https://www.facebook.com/permalink.php?story_fbid=pfbid02YAJannQNUF5LxLLRe7orm1QRgQxnvCYwD16ACzuJNzKWtCZsex7py6AvikkNprSel&id=100066855699762)

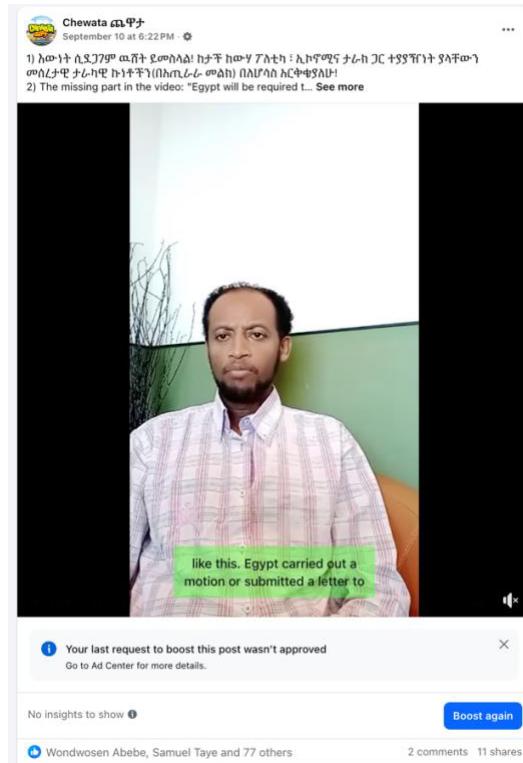

Figure 10: Meta impeded the edition of Dr Health<sup>26</sup>, an influential live fiction in the making.

<sup>26</sup> Dr ZeHealth, an influential, intercepted, or impeded, live fiction in the making plotting a fictitious regime and its corresponding cadres and few opponents.

[https://www.facebook.com/permalink.php?story\\_fbid=pfbid0UBM8FvACGDeTzh21xsGwkky6pyv1Ju7Un67UiBinSb6QdxZddWD11a8rNAmLg3Wjl&id=100066855699762](https://www.facebook.com/permalink.php?story_fbid=pfbid0UBM8FvACGDeTzh21xsGwkky6pyv1Ju7Un67UiBinSb6QdxZddWD11a8rNAmLg3Wjl&id=100066855699762)

1 **E. Meta Platforms intercepted an ongoing promotion of a post, or content,  
2 criticising the mis-informative conduct of Egypt.**

3 15. The interfered, or intercepted, post has two parts<sup>27</sup>: “A video blog and a swift scribbling.”

18 Figure 11: The post which was promoted temporarily was intercepted from promotion subsequently.

19 16. The swift scribbling had the following, from line 17 through line 87.

20 17. አዎሱት ለደግዢም ወሰኑት ይመሰላል! ከታች አዎሱ ሂሳብ የለፈት : እብጥመና ታሪክ የርሃናት የለቻዎን መሰረታዊ ታሪክዎች  
21 ከተማና (በአጠቃላይ መልካም) በለምሳኑ እርቃቶለሁ!

22 Translation: “Repetition of truth may seem lies. Behold is a run-down of basic matters regarding water politics,  
23 economics and history.”

24 18. The missing part in the video: "Egypt will be required to substitute its strategically trivial  
25 investment in military with investment in aquatic and environment value creation, promotion and  
26 protection projects in Ethiopia. In addition, intransigent Egypt will be required to ensure it doesn't

28 <sup>27</sup> The interfered, or intercepted, post. <https://www.facebook.com/ChewataGame/videos/1568467147898580>

1 carry out any harmful diplomacy, or activity, among others, against the people and state of Ethiopia  
2 in anyways, or by any means, intrinsically, such as sponsoring destabilization, conflicts and  
3 independence movements the likes of Eritrean Liberation front(1960-1962) and Oromo liberation  
4 Front(founded in 1967), among others, including engaging in lobbying campaigns and  
5 misinformation against Ethiopia." When a government by and for the people gets the chance to  
6 serve in Ethiopia, intransigent Egypt will be disciplined (the better thing) and well-positioned (the  
best thing) for its secured future like never seen before.

---

7 19. Relevant historical information(interpretations)

8 ✓ The presence of semitic languages in Ethiopia dates back to early 2000 BC.

9 ✓ Southern Atlantic Ocean was called Ethiopian Sea, or Ocean, in several manuscripts until the 19th century.

10 ✓ The oldest surviving Ge'ez manuscript — which is thought to be the second of the Garima Gospels of the  
11 Ethiopian Coptic Catholic church — dates back to the 5th, or 6th, century.

12 ✓ c.200 – 230, GDRT, King of Axum; 230-240: DBH, King of Axum; 240-260: Sembroutheios, King of  
13 Axum; 260-270: DTWNS, King of Axum; 270-310: Endubis, King of Axum; 310s: Aphilas, King of Axum;  
14 310s: Wazeba, King of Axum; Early 320s to late 320s: Ousanas, King of Axum; and 320s – c. 360 AD: Negus  
15 Ezana, King of Axum

16 ✓ In the 4th century, Ethiopia — along with Rome, Persia and China — was listed as one of the greatest  
17 politico-economic power by Mani, a Persian religious figure.

18 ✓ 20. Empirical thesis/synthesis : "Behold, I believe, is what set the precedent for the comparative and  
19 superlative under-development of Ethiopia, and sub-saharan Africa, since the 4th century: 'The systematic,  
20 politico-economical-goal-oriented, ulterior, initiation of the division of the universal church in to east and west  
21 by Alexandria, Egypt, under the pretext of disagreement (discrepancies) concerning the theological  
22 philosophy, or divine persona, or mystification, of Jesus Christ of Nazareth<sup>28</sup>,"

---

23 21. Pre-supposition: "A strategic approach"

24 <sup>28</sup> The first council of Nicaea held in Turkey set the stage for shaping the world denominationaly, culturally, politically  
25 and geographically strategically. [https://en.wikipedia.org/wiki/First\\_Council\\_of\\_Nicaea](https://en.wikipedia.org/wiki/First_Council_of_Nicaea)

1 In the 4th century, wealthy Alexandria<sup>29</sup>, Egypt wanted to disassociate from( and/or stop  
2 contributing to) the Roman empire to which it was a net-contributor while it wanted to associate  
3 with ( while extending and cementing its control over) the de facto source of its agricultural wealth,  
4 or tremendous amount of prosperity, then: "The Abay water, or Ethiopia, or eastern Africa, or sub-  
Saharan Africa."

5  
6 22. Consequently, the clergy in Alexandria, with an ulterior motive, I believe, or suppose, would come  
7 up with divergent(schismatic) theological philosophies (or theories, or mystification, or  
8 abstractions) on the philosophy of the persona of Jesus Christ in the first council of world clergies  
9 held in Nicaea, Turkey. (Needless to mention the detail which theologians know pretty-well:  
10 Nevertheless, the topics discussed, or one of the sources of contention, in the council was, "Are  
the human and divine personas of Jesus mixed?"

11  
12 23. As a result, or eventually, the universal church would be divided into east (in what becomes Coptic  
13 Catholic[Russian-Orthodox, Ethiopian-Orthodox, Greek-Orthodox, Indian-Orthodox, Romanian-  
14 Orthodox, Algerian-Orthodox and etc ]) and west (in what becomes Roman Catholic, Anglican  
15 and Lutheran subsequently, after the reformation in Europe and the degenerative, derivative,  
16 explosions of denominations in the US discretely]). And Alexandria, Egypt, the architect of the  
17 schism in the 4th century, would become the center of eastern churches, or culture, or what's  
18 customarily known as, "the Coptic Catholic Church, or Orthodox," which gave rise to one of the  
greatest western philosophers, or base-culturalists, or theologians, or spiritualists, of our time, St  
Augustin of Hippo<sup>30</sup>, Algeria, among others.

19  
20 24. Alexandria would bribe the Ethiopian Monarch, King of Axum, with gold, among others and,  
21 overriding Roman Catholicism, or the early church which had entered Ethiopia during 1AD, would  
22 get Coptic Catholicism to become the state religion of Ethiopia since the late 4th century. The  
strategic move would make it possible for Egypt to control successive theocratic governments of  
23 Ethiopia anointed and crowned by the Ethiopian Orthodox Church morphologically strategically.

24  
25  
26 <sup>29</sup> Post-Roman Alexandria — once touted "The Bread Basket" of the Roman empire — didn't only supply member  
27 states of the Roman empire with food but also luxury goods, such as papyrus, glass and flax, among others. From  
supplying Indian products through Ethiopian luxuries to grains harvested along the Nile, Alexandria was renowned for  
its cultural and intellectual brilliance and impact, among others. [https://www.youtube.com/watch?v=CKeb\\_oVsQ04](https://www.youtube.com/watch?v=CKeb_oVsQ04)

28 <sup>30</sup> St Augustine of Hippo is a renown saint, bishop, theologian, philosopher and spiritualist, among others, who  
influenced western philosophy and culture through his writings tremendously.  
[https://en.wikipedia.org/wiki/Augustine\\_of\\_Hippo](https://en.wikipedia.org/wiki/Augustine_of_Hippo)

1 25. Until the 1960s — when King Haileselassie, one of the founding fathers of African union,  
2 intercepted bringing bishops from Egypt just like King Sisinius — Egyptian bishops (some of  
3 whom were Muslims disguised as Christian clergymen superstitiously instead) would control the  
4 politics, pedagogy, diplomacy, culture and economy, among others, of Ethiopia tactically and  
strategically proactively for many centuries.

5

6 26. Pedro Páez Xaramillo, sj(born in 1564 in Olmedo, Spain, who died on May 20, 1622, in Gorgora,  
7 Gonder, Amhara, Ethiopia) wanted to build a canal to transform Ethiopia in about the same time  
8 as the Dutch, among others, were building canals across Europe. However, Egyptian bishops  
9 running the Ethiopian Coptic Church who had a distorted and unsustainable notion of aquatic and  
environmental(ecological) value proposition in their head prevented the Jesuit missionaries from  
10 taking any ground and promoting civilization in Ethiopia. For instance, modern education, or  
11 acculturated, or structured, clergy, or minister, formation the likes of Catholics and protestants —  
12 which would have got Ethiopia to be in par with Europe (in terms of the progress of its  
corresponding liberal education and civilization subsequently apparently) — was introduced very  
13 recently[though Ethiopia has been an old civilization].

14

15 27. Dealing with sense-less, devastating, civil wars and invasions, among others, Ethiopia was  
alienated, played out and insulated, among others, for many centuries. As a result, the Egyptian  
16 Coptic Church, or the elites of Egypt, controlled and molded the Ethiopian Coptic Church,  
17 religion, culture and politics, among others, for many centuries.

18

19 28. Although hard, obliterated and a painful fact to comprehend for anybody, isn't it tantalizing how  
Egypt commanded a systematic control and got Ethiopia and sub-Saharan Africa underdeveloped  
20 inside-out and outside-in exponentially, chronologically, discretely?

21

22 29. My theory — that the division of the universal church in the 4th century, as opposed to  
philosophical, or theological, is politico-economical oriented — is based my interpretation, cause-  
23 effect synthesis construction and morphological decomposition of the politico-economical,  
24 economic and cultural(including theological philosophies, among others) history, among others,  
of Europe, Egypt and sub-Saharan Africa since 1 AD chronologically.

1       30. N.B: To be able to understand my [opinions of] empirical and rational interpretations, it is essential  
2       comprehending relevant historical, theological, cultural, economic and political facts, among  
3       others, patiently. For instance, when it comes to what's noted below, among others<sup>31</sup>.

4       31. That Alexandria, Egypt was prominent when it comes to water-intensive-products during the  
5       Roman empire.

6       32. That in the 4th century, Alexandria, Egypt was a net contributor to the Roman Empire until it left  
7       for politico-economic reasons which I contended, or mystified, above.

8       33. That Alexandria, Egypt wanted to disassociate from the Roman Empire.

9       34. That Alexandria, Egypt wanted to associate to, and control, the source of the water.

10       35. That Alexandria, Egypt managed to associate and control Ethiopia subsequently.

11       36. That Alexandria, Egypt controlled the pedagogy, politics, culture, religion and economy, among  
12       others, of Ethiopia, among others, super-culturally (and sub-culturally derivatively) subsequently.

13       37. The Southern Atlantic Ocean was called, "Ethiopian Sea, or Ocean," in several manuscripts for  
14       centuries.

15       38. 1750-1850 was the era of Zemene Mesafint, or endless wars, in Ethiopia.

16       39. 1930-1974 was the time of King Haile Selassie (Tefere Mekonen).

17       40. In the 18th century, Ottoman Egypt's primary exports included textiles (raw cotton and cotton  
18       yarn), grain (particularly rice and wheat) and raw materials, among others, instrumental for the  
19       industrial revolution as we may read and interpret it.

20       41. The first industrial revolution, which started in Great Britain, spread to continental Europe, such  
21       as France, Belgium, German states and US between 1760-1840<sup>32</sup>.

---

22       <sup>31</sup> The subjective interpretations of causality formulated, just like mathematical theories, or philosophies, among others,  
23       are personal(subjective) opinions subject to review and change in part, or fully, if, and when, challenged openly.

24       <sup>32</sup> Nile, which originates from Ethiopia for the most part, supported the industrial revolution. That Ethiopia, as opposed  
25       to developing using its natural resources, such as utilizing water for irrigation and electricity, among others, was caught  
26       up in civil wars persistently, shifted power to, and enabled, the rulers of Egypt to provide much needed raw materials for,  
27       or valuable exports to, the industrial revolution, such as cotton, among others. Assumption: "Had Ethiopia not been at  
28       war in the run up to, during and after the industrial revolution, even the current day of Europe, North Africa and middle  
      east, among others, could have been the colonies of Ethiopia (Axum), if not the colony of Persia (Around Iran), China  
      and Rome — super-powers during the 4<sup>th</sup> century."

1

2 42. Ethiopia was neither a party nor participatory in the Anglo-Egyptian treaty conducted in 1929.

3     Although it was an independent country, Ethiopia was not consented about depriving itself from

4     using its water while Egypt and Sudan, for themselves, would allocate 48 billion cubic meters

5     and 4 billion cubic meters of water respectively bilaterally.

6

7 43. The industrial revolution was marked with advancements in textile manufacturing, production of

8     iron and innovation of steam engines, among others. One important empirical and rational

9     observation: "While civil wars [sponsored by foreign actors] were going on in Ethiopia, the

10     industrial revolution was elevating Europe and US to new heights of manufacturing.<sup>33</sup>"

11

12 44. 11 February 1855 - 13 April 1868 was the period of the reign of King Tewodros who, losing in

13     the Meqdella war to the invading British expeditionary forces, committed suicide [there and then]

14     in Maqdella, Wello, Ethiopia. The overthrow of Tedros prevented Ethiopia from consolidating its

15     unification and utilizing its water potential tremendously strategically while enabling French and

16     British, among other held aquatic economic activities along the Nile, to source much needed raw

17     materials and finished(and partly finished) goods which powered the industrial revolution

18     strategically, according to my empirical and rational observation and interpretation of industrial(or

19     economic) history morphologically discreetly.

20

21 45. Tekle Giyorgis (11 June 1868-11 July 1871).

22 46. Yohannes 4th (11 July 1871-10 March 1889).

23 47. Menelik 2nd, King of Shewa (1866-1889).

24 48. The battle of Gallabat (9-10 March 1889).

25 49. Menelik, Emperor of Ethiopia (1889-1913).

26 50. Egyptian-Ethiopian War(1874-1876).

27

28 51. Even after the war, Egypt continued its strategic, hybrid, interferences [discretely] to destabilize

29     and undermine the Ethiopian Kingdom. For instance, the Arsi resistance movement (1881-1892)<sup>34</sup>

30     is noted as a misguided activity.

---

27     <sup>33</sup> For instance, Egypt was exporting from raw materials to agricultural products, among others, to UK and France, among

28     other countries renown for leading and transforming through the industrial revolution.

29     <sup>34</sup> The Arsi resistance movement — like the successive civil wars carried out among different lords in Ethiopia sponsored

30     by foreign actors — undermined Ethiopia structurally and strategically.

1 52. In 1889, Ethiopia, represented by Menelik, signed the Treaty of Wuchale, Wello, Ethiopia.

2 53. The first Italo-Ethiopian war (1895-1896). During the time of the scramble for Africa, Italy would

3 attempt to colonize, or own, Ethiopia. The victory of Adwa was the first, successful, anti-

4 colonization victory by an African country. The war, apart from putting Ethiopia hundreds of years

5 behind from actualizing industrial revolution, left a legacy: "The corresponding defeat galvanized

6 revanchist sentiments in Italy which resulted in the subsequent invasion of Ethiopia in 1935."

7 54. 1898-1902: construction of Aswan Low Dam in Egypt.

8 55. 1898-1903: construction of Assiut dam, the first reservoir in the Nile which stretches up to

9 560KM.

10 56. The reign of Lij Eyasu (1913-1916)

11 57. The reign of Empress Zewditu (1916-1930)

12 58. The second Italo-Ethiopian war (October 1935-February 1937)<sup>35</sup>

13 59. The 1959 bilateral agreement between Sudan and Egypt, upholding the previous, fallacious,

14 bilateral treaty, increased the corresponding allocated water to the bipartite parties preposterously:

15 "Allocating 55.5 billion cubic meters of water, 18.5 billion cubic meters of water and 10 billion

16 cubic meters of water to Egypt, Sudan and evaporation and seepage respectively, the treaty called

17 for the joint construction of the Aswan High Dam in Egypt and the Roseires dam in Sudan, among

18 others."

19 60. 1954-1960: Aswan High Dam

20 61. 1954-1960: The closure of the Suez Canal due to the second Arab-Israel war.

21 62. In 1955, Nasser pronounced himself as the leader of the Arab nationalism.

22 63. Ethiopia inaugurated the port of Haseb, Eritrea in 1961.

23 64. In 1961, Idris Mohammed Adam and other Eritreans (Ethiopians then) founded the Eritrean

24 Liberation Front as a pan-Arab movement in Cairo, Egypt. Nonetheless, the first act of armed

25 resistance was led by Hamid Idris Awate.

---

26 <sup>35</sup> The End of the Atrocious Italian Occupation: 84th Anniversary

27 <https://zehabesha.com/the-end-of-the-atrocious-italian-occupation-84th-anniversary/> Again, the occupation by Italy, just

28 like the first Italo-Ethiopian war (1895-1896), predisposed Ethiopia to political, economic, social, cultural, diplomatic, industrial and military, among others, drawbacks significantly while it empowered, or shifted the balance of power to, Egypt significantly strategically, setting the stage for the holistic growth at scale of Egypt and the Arab world strategically. One thing observed: "Italy maintained a good trading relation with the Arab world [subsequently] while the Arab league stood against the territorial integrity of Ethiopia strategically by supporting separation movements, among others, openly."

1 65. Founding and decline of the Eritrean Liberation Movement (1958-1959)

2 66. Formation of the Eritrean Liberation Front (1960-1962)

3 67. In 1960, adopting the tactics used by the national liberation front of Algeria, Egypt started training  
4 Eritreans (Ethiopians then) rebels in Alexandria. In addition, Egypt provided multidimensional  
5 resources for media and insurgency, among other campaigns, against the territorial integrity,  
6 development and prosperity of Ethiopia strategically. For instance, Woldeab Woldemariam  
7 bombarded Ethiopia with different types of insidious, ulterior, propagandas from Cairo  
8 relentlessly. Most of the founders of the pan-Arabic movement of ELF (Eritrean Liberation Front)  
9 were Muslims while the ruling class in Ethiopia was Christian for the most part. As a result, Egypt  
10 Mobilized broad-based support for ELF from the Arab League which foresaw the strategic  
11 importance of controlling the Red Sea and Ethiopia discretely to helping fellow Muslim allies  
12 challenge Ethiopia from within, pledging support to ELF in 1962. Furthermore, Sudan allowed  
13 ELF to transfer weapons and organize military operations. Nonetheless, the US, signing a secret  
14 packet with Ethiopia, affirmed its opposition to any insurgency against Ethiopia commanded from  
15 Egypt [ but only] for some time while denying access to finance and marshal-aid (which was given  
16 to a non-ally Germany) discretely<sup>36</sup>.

17 68. 1960-1970: The construction of Aswan dam in Egypt by the military regime which took power  
18 following the revolution in 1952.

19 69. On the 1st of September 1961, ELF, under the leadership of Hamid Idris Awate, fired the first  
20 shot in its battle touted as that which was done for independence ulteriorly strategically.

21 70. Idris Mohammed Adam(1922-2003), president of the Eritrean Assembly and prominent leader of  
22 the ELF, was born in Akordat, Eritrea. His father was a farmer who moved to Sudan and joined  
23 the Sudanese army in Ghedaref. As a matter of fact, Idris, under the care of the intel of Sudan, did  
24 his elementary studies in Sudan<sup>37</sup>.

25  
26 <sup>36</sup> As part of the 7th Infantry Division, Ethiopia fought on the side of US soldiers, among others, during the Korean war.  
27 https://en.wikipedia.org/wiki/Kagnew\_Battalion For some reasons, South Korea was able to cooperate with US and grow  
28 tremendously while Ethiopia couldn't even get the slight support, or loan, it needed to be able to use its water resources  
and meet the basic needs of its people, if not to advance industrialization exponentially subsequently. Had US treated  
Ethiopia like South Korea, Ethiopia, with its billionaires charting in the top 25 list, could have been one of the most  
industrialized, technologically-advanced and politically-powerful(a super-power) country on earth.

<sup>37</sup> The Sudanese intel, and Egypt, which controlled Sudan indirectly, are suspected of shaping the current, divided, harm-harm(or lose-lose) state of affair between landlocked Ethiopia and isolated-Eritrea (i.e. the north Korea of Africa).

1 71. In 1967, with the help of Egypt, Hussein Sora of the Oromo Liberation Movement (OLF),  
2 among others, founded the Ethiopian National Liberation Front (ENLF) in Somalia.

3 72. Sora would become the secretary general of ENLF which trained members of the Oromo  
4 community in Yemen and North Kenya, among others.

5 73. TPLF (Tigray people's liberation front) — which is a member of ENLF — would come out of a  
6 student movement in the 1960s.

7 74. In 1973, the Wello Famine, an artificial drought which killed 40k to 200k people at least,  
8 jeopardized the reign of Haile Selassie who, putting aside his plan for construction of dams, among  
9 others, was busy maintaining the territorial integrity of Ethiopia primarily.

10 75. 12th of September 1974: Dissolving the Crown Council and Imperial Court, and disbanding the  
11 emperor's military staff, the Derg regime began detaining PM Endalkachew's closest advisors.

12 76. The Ethiopian Revolution (12 September 1974 to 28 May 1991) was a tremendously devastating  
13 period of civil, political and military, among others, upheaval in Ethiopia which misguided and  
14 undermined all stakeholders in the country strategically. The culprits: "Both the superstitious and  
15 preposterous regime, and its corresponding opponents and foreign actors."

16 77. In 1975, Aregawi Berhe founded the Tigray People's Liberation Front.

17 78. 1977 to 1991, the period of the reign of Mengistu Hailemeriam, yet again, was a period of the  
18 race to the bottom for the most part intrinsically.

19 79. 1983–1985: Due to the occupation of most parties, such as regions, states, farmers, elites and  
20 administration, among others, with senseless insurgencies for liberation and war, among others,  
21 there was a widespread famine in Ethiopia. In the fall of 1984, northern Ethiopia was hit with  
22 artificial droughts. As a result, lots of people died in Tigray, Wollo and Eritrea.

23 80. Meles Zenawi, President of Ethiopia from 1991 to 1995.

24

25

26

27

28

1       81. Eritrea, land-locking Ethiopia effectively, would declare its independence and gain international  
2       recognition (with the leading support of the Arab League) subsequently in 1993, without the  
3       consent of the people of Ethiopia fundamentally<sup>38</sup>.

4       82. Meles Zenawi, Prime minister of Ethiopia from 1995 until his death in 2012<sup>39</sup>.

5  
6       83. In 2008, without the knowledge and consent of ethnic Amharas residing in al-Fashaga, Ethiopia,  
7       TPLF-EPRDF led Ethiopia, in what many suspect as “a transitive deal,” agreed the al-Fashaga  
8       region would be incorporated as part of Sudan while allowing Amhara farmers to continue living  
9       there undisturbed<sup>40</sup>.

10       84. 6 May 1998 – 18 June 2000: Yet another senseless, insane, devastating, preposterous and  
11       superstitious war broke out between Eritrea and Ethiopia across Badime, Zal Anbesa and Bure,  
12       among other, regions<sup>41</sup>.

13  
14       85. 2012 to 2018: PM Hailemariam Desalegn of EPRDF<sup>42</sup>.

---

15  
16  
17       <sup>38</sup> Befor declaring independence without the consent of the people of Ethiopia in its current form, Eritrea could have  
18       arranged, or left, the Asab region and port for Ethiopia. Todate, Ethiopia is still making a case to regain Asab. Lack of  
19       access to a free port isn't only harmful for the economy of Ethiopia but also a force divider when it comes to promoting  
20       aquatic value creation, protection and promotion along the Nile imperative for the region and the security of the  
21       international order here and now and in the future. New Horizons: Ethiopia's Strategic Move to Reclaim Massawa and  
22       Aseb Ports. <https://zehabesha.com/new-horizons-ethiopias-strategic-move-to-reclaim-massawa-and-aseb-ports/>

23  
24       <sup>39</sup> Zenawi's period was marked with strategic, and structural, sabotages which a) divided and deformed Ethiopia into  
25       disharmonized nation and nationalities of unending ethnic conflicts as opposed to a normative system of federalism  
26       propagating optimum, strategic, functional, ethnic and linguistic allocation structure of public administration powering  
27       transparency, rule of law, periodic election, free press, stability, dispute resolution, cohesion, synergy, growth and  
28       transformation, among others, b) as opposed to striking a deal on Assab, resulted in a costly, avoidable and unneeded,  
29       war with Eritrea[There isn't any problem with the people of Eritrea and Ethiopia.], and c) recorded numerous cases, and  
30       cases with-in cases, of political arrests and deaths, among others. In addition, Addis Abeba, or Kilel 14(which is more  
31       populous than Tigray, the home state of Meles Zenawi, lost its de facto right to 1) administer itself through a democratic  
32       election, 2) equitable, normative, representation in the federal branch of the government of Ethiopia, such as the house of  
33       peoples federation, among others, and 3) through truly representative, transparent and accountable public officials  
34       resonating to the will of the people.

35  
36       <sup>40</sup> The Ethiopian government [then] blamed Egypt for supporting Eritrea. In addition, in 2024, Egypt, Eritrea and Somalia  
37       — which are nurtured by Ethiopia — formed a strategic alliance against Ethiopia.  
38       <https://www.geopoliticalmonitor.com/the-egypt-eritrea-somalia-alliance-a-strategic-counterbalance-to-eritrea/#:~:text=These%20ambitions%20center%20around%20an,over%20the%20past%20few%20years.>

39

41       <https://everycasualty.org/conflict/eritopia/>

42       <sup>42</sup> Desalegn's period was marked with a wave of anti-EPRDF, or anti-government, protests and, with the Amhara and  
43       Oromia region playing the predominant role, numerous arrests and deaths across the country.

1       86. Since 2018, Abiy Ahmed Ali of EPRDF (now Prosperity Party) is serving as a the PM of Ethiopia.  
2       Like his predecessors in EPRDF, Meles and Hailemariam, among others, Abiy is executing  
3       oppressive, unacceptable and devastating policies which resulted in displacement<sup>43</sup>, armed  
4       resistance, destabilization and economic damage, among others, worth of billions and trillions  
5       exponentially weakening Ethiopia strategically<sup>44</sup>.

6       87. By mid-July 2025, Egypt — surging to a record export of 6.240 million tons, diversifying in  
7       different sectors discretely and adding 8 new markets — recorded its highest (recorded or  
8       unhidden) agricultural economic value proposition for export ever, according to Alaa Farouk,  
9       minister of Agriculture and Land Reclamation for Egypt<sup>45</sup>.

10      88. The transcription of the video blog:

11  
12      89. I was browsing through my Facebook newsfeed yesterday morning and I bumped into an  
13       interesting post which read like this, “Egypt carried out a motion or submitted a letter to the  
14       Security Council<sup>46</sup>,” and I was wondering what and why subsequently as Egypt did not send a

---

15  
16      <sup>43</sup> Abiy's current, ongoing, premiership period, upholding the disastrous legacy of mass-displacement, arrests, deaths  
17       and insurgency of Desalegn and Meles, among others, is marked with a) the persecution of the people of Amhara and  
18       the Ethiopian Orthodox church, the atom of the base culture of Ethiopia, b) suppression and exploitation of Addis  
19       Abebians and c) continuation of ethnic attacks, conflicts and civil war in the Amhara, Oromia and Tigray region of  
20       Ethiopia for the most part. [https://en.wikipedia.org/wiki/Persecution\\_of\\_Amhara\\_people](https://en.wikipedia.org/wiki/Persecution_of_Amhara_people)

21      <sup>44</sup> Human Rights Watch. Country Profile: Ethiopia. [https://www.hrw.org/africa/ethiopia?utm\\_source=chatgpt.com](https://www.hrw.org/africa/ethiopia?utm_source=chatgpt.com)

22      <sup>45</sup> While most of the people of Ethiopia don't have enough water for basic consumption, such as drinking, hygiene and  
23       electricity(energy), among others, Egypt's water intensive agricultural exports hit record high by mid-July, adding 8  
24       new markets. <https://us.sis.gov.eg/Story/211110/Egypt%20%99s-agricultural-exports-hit-record-high-by-mid-July%2C-add-8-new-markets?lang=en-us>

25      <sup>46</sup><https://www.facebook.com/kenyanreportnews/posts/pfbid02LEtu8ATQeEtbmMwJyWC6pGvcEv5zUVB4EJfWNpLe61MgrTjsVotoPv6dYFeSGF1MI> Opposing the dam which Ethiopia built to achieve one, early, milestone towards  
26       attaining its objectives of meeting its basic security and enhancing exponential water and environmental value creations,  
27       among others, discreetly, intransigent Egypt submitted an opposition letter to the security council. The current government  
28       in Ethiopia didn't portray any diplomatic motion, such as submitting a letter of opposition, among others, in due time  
      when Egypt ventured on undertaking mega-city-expansion projects, among other water intensive grand projects, without  
      the consent of, and consultation with, Ethiopia, among others. In addition, that Egypt is in a desert, it doesn't mean  
      Ethiopians cannot achieve basic security (or self-reliance) while Egypt can indulge in exporting billions and billions worth  
      of water intensive products to Europe, among others. Superstitiously and preposterously, Egypt can't frame and present  
      its basic security is jeopardized while exporting billions and billions, billions and billions and billions and billions worth  
      of water intensive products while the statically significant population of Ethiopia is not using its water to meet basic  
      security (or need). Furthermore, forget about anything beyond equitability(which has long been happening after Egypt  
      weakened the Ethiopian empire, or territory, discreetly, even the adoption of equitability must come with binding clauses,  
      upholding normative diplomatic standard: "No single, harmful, political and cultural, among others, conducts to the state  
      of Ethiopia, without precluding the need for fervent, direct and indirect, participation in aquatic-value-creation activities  
      in the Ethiopian highlands before earmarking over-expenditure on national defense and mal-geopolitical interferences in  
      the horn."

letter of gratitude to the people and government of Ethiopia regarding the inauguration of Ethiopia's dam yesterday. As a result, I, empirically and rationally, was very surprised to learn about the content of the letter subsequently. Regrettably, the letter was not about Egypt expressing its deepest gratitude, noblest intention and profound appreciation to the people and government of Ethiopia for completing one of the milestones, or projects, needed to be completed to protect, generate and promote aquatic and environmental value creations, and their corresponding ontologies, for both Ethiopia and riparian countries down the stream directly and indirectly while enhancing the basic, imperative, security of the people of Ethiopia and its neighboring countries but opposition to the hard fought steps in the right direction taken to secure the future of all parties directly and indirectly. As I said time and again, the problem is with the Ethiopian government. The problem, in my opinion, in my firm belief, is with the Ethiopian elite. As it stands, the problem for me is not with Egypt, which carried out water-intensive, grand-mega-city-expansion, underground-water-storage and afforestation, among other projects, silently, during which the Ethiopian government was quiet<sup>47</sup>. The Egyptian government did not say anything about the projects. Very big ones [by the way] which consume tremendous amounts of water. The Ethiopian government did not say anything about the projects. The Ethiopian government was quiet. Nor submitted any motion of opposition to the Security Council. Nor the Ethiopian government expressed any opposition regarding the fact Egypt, building unfair, unrealistic, unequitable, unconsented and unsolicited reliance exponentially, violated normative principles of golden rules and equitability, among others, intrinsically. Ladies and gentlemen, Egypt exports billions and billions, billions and billions and billions and billions worth of water intensive products to the rest of the world, transcending the notion of achieving basic security as we may know and see it intrinsically subjectively and objectively, among others, while the majority of the people of Ethiopia, when I say majority, look, I'm talking about the statistically significant majority, more than 95% of the population of Ethiopia, have yet go to achieve water security for the exclusive purpose of meeting basic needs, such as drinking, hygiene and laundry, among others<sup>48 49</sup>. The

---

<sup>47</sup> While Egypt doesn't consult the Ethiopian government, or media, among others, every time it embarks on any, new, water-intensive, projects requiring tremendous amount of adjustment from Ethiopia, it is attentive solely to what happens along the Abay river or the Blue Nile.

<sup>48</sup> By 2010, Egypt's rate of penetration of piped water in cities and rural areas reached 100% and 93% respectively, according to Wikipedia 2025. [https://en.wikipedia.org/wiki/Water\\_supply\\_and\\_sanitation\\_in\\_Egypt](https://en.wikipedia.org/wiki/Water_supply_and_sanitation_in_Egypt)

<sup>49</sup> While Egypt hypes it's located in the desert, and that it relies on Nile for its survival, in what clearly transcends outstanding existential matter as compared to Ethiopia unequivocally, it exports billions and billions, billions and billions and billions of cubic meters of water-intensive products to Europe, Middle East and Brazil, among others. In addition, 79%, 59% and 94% of the population of Egypt uses safely managed drinking water, properly managed sanitation and in-home-hand-washing facility with soap and water, respectively, among others. [Behold is the corresponding sdg6data, such as the rate of water-adoption for Egypt. <https://www.sdg6data.org/en/country-or-area/Egypt>]

1 source of the water, Ethiopia, has over 95 million people in need of achieving water security for  
2 basic needs<sup>50</sup>, such as drinking, hygiene and laundry, among others, while Egypt, which,  
3 superstitiously and preposterously, and, many times, through hybrid-warfare, misinformation and  
4 disinformation, among others, is touting, “an elevated, or critical, state of jeopardy of its security  
5 and existence,” when it is exporting billions and billions, billions and billions and billions and  
6 billions of cubic meters of water-intensive products to the rest of the world or at a time when the  
7 outflow of water from Ethiopia to the riparian countries down lake-Tana increased, among others.  
8 One thing is clear: “It cannot be any superstitious and preposterous than this in that intransigent  
9 Egypt is complaining deceitfully while it expanded its water value-creations discretely relatively  
10 and absolutely strategically<sup>51</sup>, making, or while making, false allegations, insidious propagandas  
11 and indoctrinations relentlessly time and again.” Like I said time and again, I believe the problem  
12 is with the current government of Ethiopia<sup>52</sup>. I believe the problem is with the numb elites of  
13 Ethiopia. I believe the problem is with the clergy of Ethiopia who are not promoting equitability  
14 and the golden rules. I believe the problem, yet again, is with the community of journalists,  
15 diplomats, politicians and intelligence analysts, among others, in the world who are not willing,  
16 and apparently not able, to differentiate between isolated facts and well-positioned hybrid  
17 strategies, isolated facts and bamboozling lies, isolated facts and organized dects, isolated facts  
18 and constantly popping out manipulations, isolated facts and frequently encountered  
misinformation, misrepresented and miscommunicated facts of Ethiopia and overrepresented and  
well indoctrinated disinformations of Egypt, isolated facts of Ethiopia and well-positioned  
messaging, or communication, of Egypt comprising of hybrid strategies for the most part, isolated  
facts and insidious indoctrinations, isolated facts and constantly degenerating stories and

19

---

20 <sup>50</sup> Nevertheless, only 14%, 8.04% and 3% of the population of Ethiopia has a safely managed drinking water, properly  
21 managed sanitation and in-home-hand-washing facility with soap and water, respectively, among others. Behold is the  
corresponding SDG 6 visual data of Ethiopia showing a tremendously stark granular variation or discrepancy:  
<https://www.sdg6data.org/en/country-or-area/Ethiopia>

22 <sup>51</sup> While Egypt hypes it's located in the desert, and that it relies on Nile for its survival, in what clearly transcends  
23 outstanding existential matter as compared to Ethiopia unequivocally, it exports billions and billions, billions and billions  
and billions and billions of cubic meters of water-intensive products to Europe, Middle East and Brazil, among others. In  
24 addition, 79%, 59% and 94% of the population of Egypt uses safely managed drinking water, properly managed sanitation  
and in-home-hand-washing facility with soap and water, respectively, among others. [Behold is the corresponding  
25 sdg6data, such as the rate of water-adoption for Egypt. <https://www.sdg6data.org/en/country-or-area/Egypt>]

26 <sup>52</sup> As opposed to uniting the people of Ethiopia around a common, normative, vision, and democratic scaffoldings, or  
27 operational frameworks, or government-system, among others, which support the strategic execution, and review of , the  
dreams, goals and objective of the people of Ethiopia, which is promoting unity, stability, capacity building and growth,  
among others, upholding the golden rules and normative principles, among others, the current regime in Ethiopia,  
28 Prosperity Party, which is formed from the merger of former constituents of EPRDF and its partners, such as ADP, ANDP,  
APDO, BGPDUF, ESPDP, GPDM, HNL, ODP and SEPDM, is still carrying out genocide and suppression unceasingly:  
<https://zehabesha.com/ethiopia-washington-update-50-state-strategy-a-call-to-action/>

1 suppressed facts and well-presented acts and directions. Another thing clear: “Of course,  
2 upholding equitability, which as it stands, is not a problem with the current government of  
3 Ethiopia.” Ethiopia has the most ethical record. The most important thing right now for Ethiopians  
4 is this: “Doing our homework properly. I believe in completing our homework, or I believe in acts  
5 of putting our house in order, as an imperative element in the compound and mixtures of water  
6 politics as we may know and see it.” As a result, the problem is with the Ethiopian government or  
7 elite. Not with Egypt which cannot be blamed for taking over, and creating value on, abandoned  
8 resources, eliciting, reformulating and defining its own subjective notion of attaining basic security  
9 through a higher standard, or value proposition, transcending equitability intrinsically<sup>53</sup>. For  
10 instance, Egypt is exporting billions and billions, billions and billions and billions and billions  
11 worth, or cubic meters, of water-intensive products to the rest of the world while Ethiopians are  
12 missing billions and billions, billions and billions and billions and billions of cubic meters of water  
13 for drinking, cooking, hygiene and laundry, among others<sup>54</sup>. One thing is clear: “The status quo  
14 cannot continue.” Instead, I believe what's going to happen is that to uphold equitability,  
15 normativism and principles of golden rules, among others, Egypt will be forced, or required, to  
16 cut down on investing in military and invest in aquatic water and environmental value creation  
17 and protection projects in the Ethiopian Highlands, the source of the water for the most part<sup>55</sup>.  
18 Although it is going to be in the best interest of Egypt in the first place, and that it should have  
19 come from Egypt gladly, it is unbelievable Ethiopia will be the one requesting Egypt to put money  
20 on water value creation spheres or matters strategic to the promotion of water and environmental  
21 security directly and indirectly. One thing is tremendously superstitious and preposterous  
22 undoubtedly: “As opposed to Egypt kindly requesting, or in some cases begging Ethiopia to

---

23<sup>53</sup> While Egypt hypes it's located in the desert, and that it relies on Nile for its survival, in what clearly transcends  
24 outstanding existential matter as compared to Ethiopia unequivocally, it exports billions and billions, billions and billions  
25 and billions and billions of cubic meters of water-intensive products to Europe, Middle East and Brazil, among others. In  
addition, 79%, 59% and 94% of the population of Egypt uses a safely managed drinking water, properly managed  
sanitation and in-home-hand-washing facility with soap and water, respectively, among others. [Behold is the  
corresponding sdg6data, such as the rate of water-adoption for Egypt. <https://www.sdg6data.org/en/country-or-area/Egypt>]

26<sup>54</sup> Nevertheless, only 14%, 8.04% and 3% of the population of Ethiopia has safely managed drinking water, properly  
27 managed sanitation and in-home-hand-washing facility with soap and water, respectively, among others.  
Behold is the corresponding SDG 6 visual data of Ethiopia showing a stark granular variation:  
<https://www.sdg6data.org/en/country-or-area/Ethiopia>

28<sup>55</sup> While Egypt isn't planning to start any war with Italy, Libya, Israel and Sudan, among others, according to the expressly  
stated mission of the armed forces of Egypt, US keeps on granting a controversial military aid to Egypt which could have  
been supplemented, or utilized, for much needed, sustainable, aquatic-value creations, protection and promotion, among  
others, projects important not only for Egypt but also for all riparian countries in the region and the security of the world  
strategically intrinsically. Reuters news says: “\$1.3 billion in military aid, overriding rights conditions.”  
<https://www.reuters.com/world/biden-administration-grants-egypt-13-billion-military-aid-despite-rights-2024-09-11/>

1 promote aquatic and environmental value creations, protection and development programs in the  
2 Ethiopian Highlands<sup>56</sup>, it is surprising in the 2025 we are in that it is Ethiopia defending its novel  
3 project which contributes towards environmental protection and revitalization. It is Ethiopia  
4 defending the interest of Egypt, among others, strategically. It is unbelievable but something  
5 believable is coming up and will happen and behold I believe this message is going to change  
6 people regarding what they hear, read and believe. I believe this message is going to change people  
7 regarding what they think, how they think and how they formulate an opinion. And I believe this  
8 message is going to help people differentiate between the facts of Ethiopia<sup>57</sup> and the fictions of  
9 Egypt derivatively, integrally, exponentially and historically discretely. I believe this message is  
10 going to help people differentiate between the isolated facts of Ethiopia<sup>58</sup> and the bamboozling  
11 hybrid strategies bombarding unobsessive truth seekers orthogonally indiscriminately by Egypt. I  
12 believe this message is going to help people differentiate between the isolated facts of Ethiopia  
13 and the bamboozling lies disseminated by Egypt relentlessly<sup>59</sup>. I believe this message is going to

---

14 <sup>56</sup> While it's possible to green-up all liveable areas all the way from Ethiopia through Israel in about 125-150 years of  
15 time, historical and contemporary bad leadership tactics and strategies and policies exhibited along the Nile ignored the  
16 future, such as co-creating value for the common future through aquatic value-creation, protection and promotion  
17 projects, priorities and predicates, among others. Moving forward, the conscious choice, or the shape of the future, is  
18 ours: "Horizontal fights, or fault-plays, such as strategic undermining, sabotage and disparagement, among others,  
19 until there is nothing to fight for or a vertical, or ethical, fight, or a fight for level-up, such as advancing aquatic creation  
20 and protection, among others, so there will be more to share abundantly, upholding humanity and the natural co-  
21 existence among the riparian nations which stood the test of time."

<https://www.facebook.com/ChevataGame/videos/1002747881018378>

22 <sup>57</sup> Nevertheless, only 14%, 8.04% and 3% of the population of Ethiopia has a safely managed drinking water, properly  
23 managed sanitation and in-home-hand-washing facility with soap and water, respectively, among others. Behold is the  
24 corresponding SDG 6 visual data of Ethiopia showing a stark granular variation: <https://www.sdg6data.org/en/country-or-area/Ethiopia>

25 <sup>58</sup> Nevertheless, only 14%, 8.04% and 3% of the population of Ethiopia has safely managed drinking water, properly  
26 managed sanitation and in-home-hand-washing facility with soap and water, respectively, among others.  
27 Behold is the corresponding SDG 6 visual data of Ethiopia showing a stark granular variation:  
<https://www.sdg6data.org/en/country-or-area/Ethiopia>

28 <sup>59</sup> Despite being located in the desert and having a higher private consumption and generic aquatic-economic-value-  
29 proposition rate compared to Ethiopia, Egypt keeps on disseminating bamboozling lies of mis-treatment by Ethiopia  
30 time and again relentlessly unfairly. As opposed to showing historical consumption and aquatic economic value  
31 actualization data, as part and parcel of its hybrid strategy, Egypt presented and justified its location in the desert as a  
32 substantive pretext for its right to surpass Ethiopia unequitably indirectly, exporting in billions, violating international  
33 laws, golden rules and normative principles and equitability intrinsically. For instance, Egypt says: "Ethiopia violates  
34 international law or equitability indirectly." <https://www.aa.com.tr/en/africa/egypt-warns-ethiopia-s-nile-dam-violates-international-law-in-letter-to-un-security-council/3682496> The political ecosystem of Ethiopia has been, and is,  
35 controlled, and shaped, by Egypt, and for Egypt, for the most part directly and indirectly. EPRDF(rebranded to  
36 Prosperity Party since 2018) was nurtured by, or come to exist because of, Egypt indirectly. OLF(Oromo Liberation  
37 Front) was nurtured by, or come to exist because of, Egypt. ELF(Eritrean Liberation Front), the derivative of which is  
38 running Eritrea terroristically[Eritrea is a hail, impediment and threat for both Eritrea and Ethiopia] to date, was  
39 nurtured by, or come to exist because of, Egypt and the Arab League, an entity which implemented concrete, harmful,  
40 political, cultural and military, among others, projects against the territorial integrity, stability and growth of Ethiopia  
41 strategically from many years ago. a) Eritrean Liberation Front [https://en.wikipedia.org/wiki/Eritrean\\_Liberation\\_Front](https://en.wikipedia.org/wiki/Eritrean_Liberation_Front)

1 help people differentiate between the isolated facts of Ethiopia and the cunningly organized deceits  
2 and manipulations of Egypt. I believe this message is going to help people differentiate between  
3 the isolated facts of Ethiopia and the constantly popping out PR stunts by Egypt [immanent in  
4 which is manipulation of truth subjectively and objectively strategically]. I believe this message is  
5 going to help people differentiate between the isolated facts of Ethiopia and the relentless  
6 misinformation by Egypt encountered by several parties frequently. I believe this message is going  
7 to help people differentiate between misrepresented and miscommunicated facts which Ethiopia  
8 has in its store and the over-represented and well indoctrinated misinformation released by Egypt  
9 flooding the media and diplomatic landscape. I believe this message is going to help people  
10 differentiate between the suppressed facts of Ethiopia and the well-positioned messaging and  
11 communication of Egypt comprising of hybrid strategies for the most part. I believe this message  
12 is going to help people differentiate between the isolated facts of Ethiopia and the insidious  
13 indoctrinations of Egypt. I believe this message is going to help people differentiate between the  
14 isolated facts of Ethiopia and the constantly degenerating fictions of Egypt. I believe this message  
15 is going to help people differentiate between the suppressed facts of Ethiopia and the well-  
16 presented acts and directions of Egypt. But I think I believe this message is going to change people  
17 about how they think, believe and form an opinion regarding the river Nile, history and politics,  
18 among others. Thank you very much. I appreciate you. Thank you very much. See you another  
19 time.

20 90. In the first place, the corresponding ad for the post in figure 11, was running without any problem  
21 like some of the political, social and economic, among others, ads in the Chewata page without  
22 any problem. Nevertheless, after recording an inorganic(promoted) reach of 28747 impressions,  
23 79 likes and 11 shares, according to Figure 11 & 12, Meta, citing the illegality of running ads about  
24 social, economic and political issues, would return a notification for rejection, according to Figure  
25 13.

26 \_\_\_\_\_  
27 b) TPLF — the main founder of EPRDF, which after nearly three decades in power, was reorganized and rebranded to  
28 Prosperity Party in 2018 — was formed and supported by Eritrean People's Liberation Front (EPLF) which was  
supported by Egypt and Sudan, among others. [https://en.wikipedia.org/wiki/Tigray\\_People%27s\\_Liberation\\_Front](https://en.wikipedia.org/wiki/Tigray_People%27s_Liberation_Front) c)  
Oromo Liberation Front(OLF) is renowned for receiving strategic supports from Egypt, Sudan and Somalia, among  
others.

Figure 12: Number of impressions of the post in Figure.

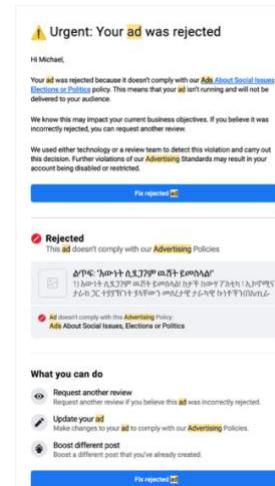

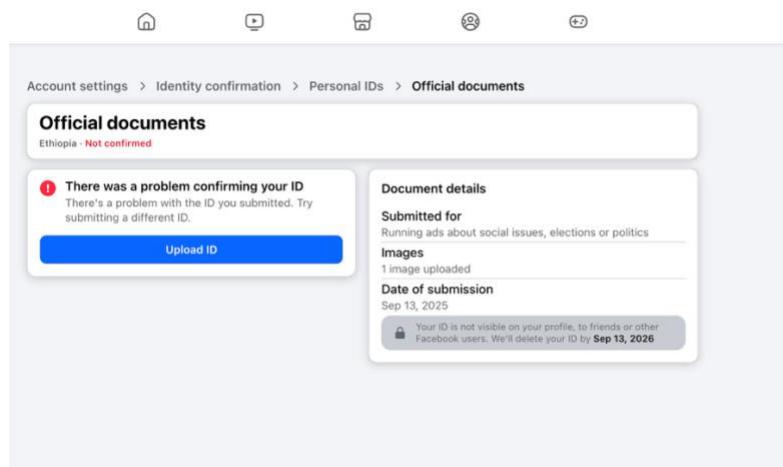

Figure 13: The corresponding notification of rejection.

1 **F. Meta Platforms failed to process a legit ID uploaded to be able to continue**  
2 **running creatives in the jurisdiction envisaged, impeding the uninterrupted,**  
3 **holistic, growth and promotion of an idea.**

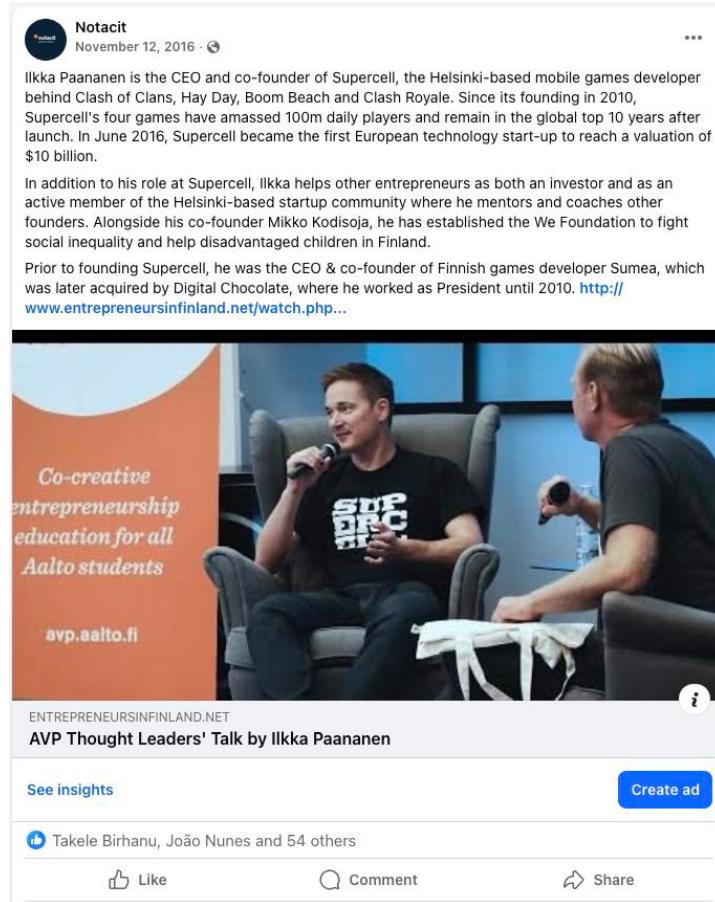

4 91. Although the required legit ID was uploaded, Meta failed to verify an ID which has been uploaded,  
5 verified and used before in due time. Through its inconsistent conduct, Meta a) impeded the  
6 inorganic(promoted) growth of the corresponding post, page and idea, among others, b) resulted  
7 in avoidable emotional distress as usual, among others. In addition, due to Meta's further delay in  
8 verifying the ID uploaded, the corresponding creative, or ad, attached to the post is not running  
9 anymore. Behold isn't the first time Meta, citing selected political posts discriminatively, rejected,  
10 or intercepted, ads aimed at promoting posts which can't reach otherwise, or organically, as the  
11 page had already been jeopardized as outlined in the previous substantive allegations, citing social,  
12 political and economic issues discriminately.

22 Figure 14: Meta failed to verify a legit ID the likes of which was uploaded and verified before in due  
23 time.

1 **G. Meta Platforms prevented ads released from the social entrepreneurship**  
2 **education platform, EntreprenuersinFinland, for unknown reasons.**

3  
4 92. A product out of service currently, Notacit — which was known as entrepreneursinFinland before  
5 — garnered around 2K visitors a day to its corresponding entrepreneurship-education-crowd  
6 platform, [www.entrepreneursinfinland.net](http://www.entrepreneursinfinland.net), for couple of years. Meta Platforms impeded the organic  
7 growth of the well-pivoted, well-validated and growing product by blocking the corresponding  
8 ads released from the page and preventing the sharing of the page's educational(entrepreneurship)  
9 contents to relevant groups, among others, time and again discriminately, leading to inhibition of  
10 exponential growth and scale up strategically.

26 Figure 15: Example of a content shared in the fan page of EntreprenuersinFinland.  
27  
28

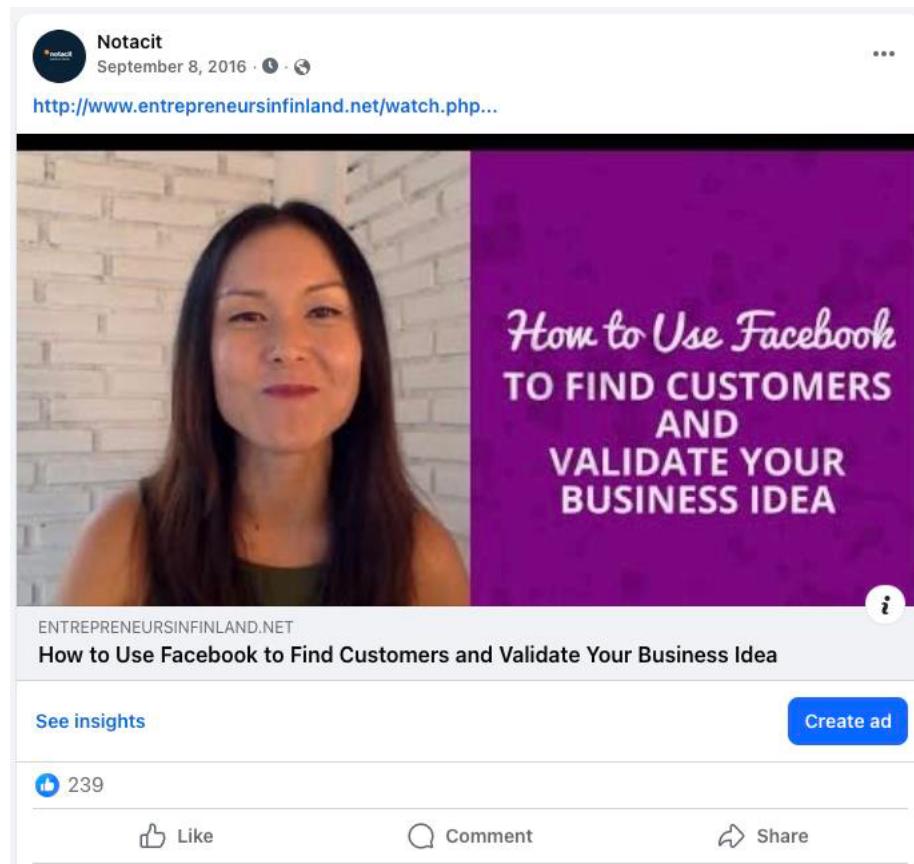

Figure 16: Example of a content shared in the fan page of EntrepreneursinFinland.

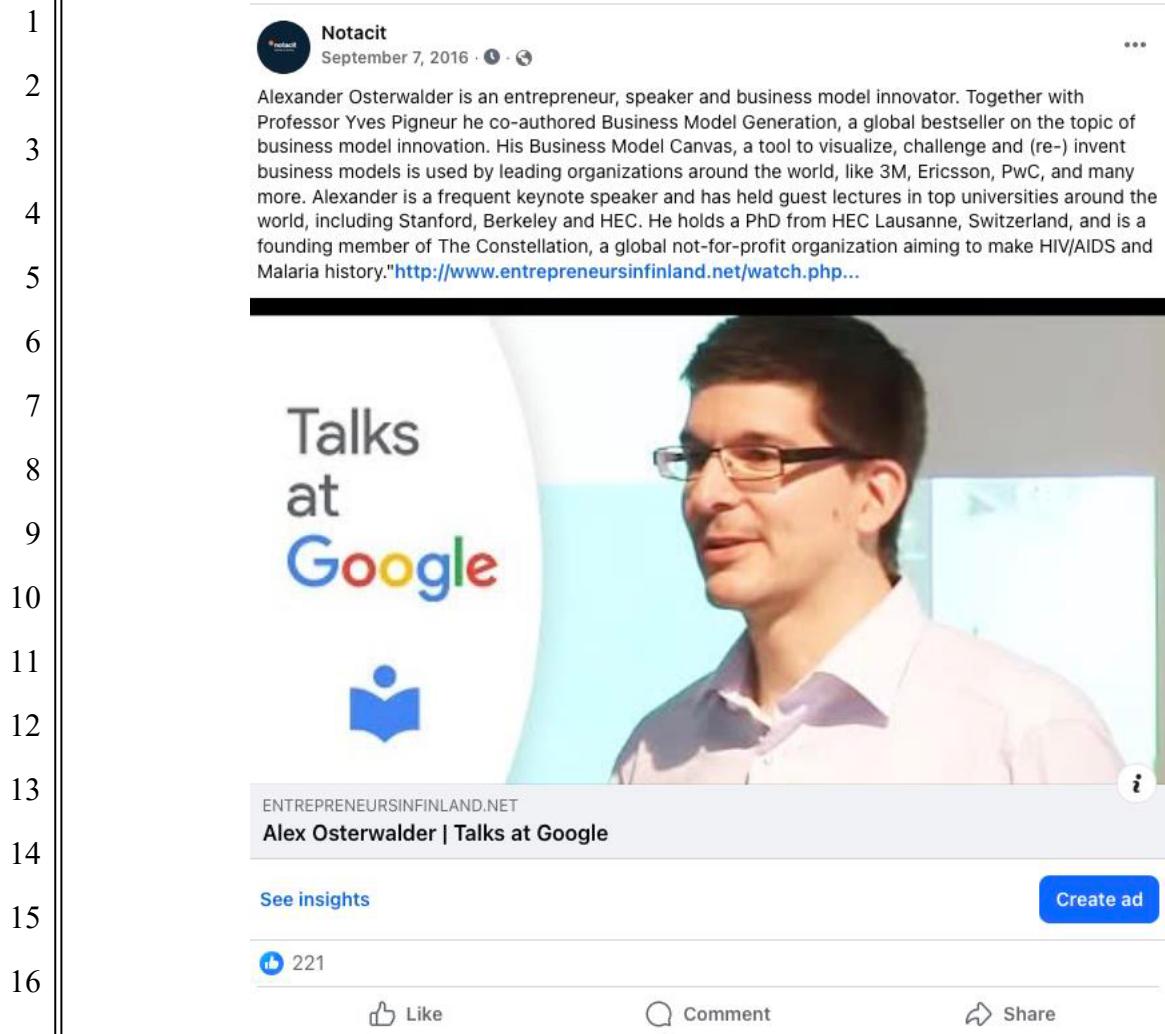

Figure 17: Example of a content shared in the fan page of EntrepreneursinFinland.

Figure 18: The corresponding logos of EntrepreneursinFinland then.

1           **Partially, or fully, attained, or undermined, objectives (to mention but a few) of**  
2           **everything damaged by Meta or Facebook.**

3           93. The objectives of the pages, products, services, scientific research, interpretations, updates and  
4           causes, among others, are:  
5           ✓ To liberate over 120 million Ethiopians from tyranny using non-violent, or truly intellectual, means.  
6           ✓ To counter established cultural and political local and foreign, among others, forces in the private,  
7           non-gov and state, among others, spheres weighing on the transition to bi-partisan democracy of  
8           Ethiopia negatively.  
9           ✓ To inform, educate, inspire, equip and challenge, among others, all Ethiopians, or Ethiopian elites, in  
10           the Ethiopian political ecosystem, among others, about bi-partisan democracy, historical mistakes  
11           made and the way forward, among others.  
12           ✓ To expose, correct and avoid human and democratic rights violations(Behold also applies for some of  
13           the contents related to Finland)  
14           ✓ To campaign against injustices, or political structures, or political parties, or regimes, among others,  
15           violating the human and democratic rights of the people of Ethiopia. As a matter of fact, the pages  
16           under dispute with Meta are the first and the only in the history of politics in Ethiopia {especially in  
17           the run up to the resignation of TPLF(EPRDF), which has been in power for three decades, after the  
18           public, including US senators, said, “Game Over to TPLF,” } to execute ads of which score is 100%  
19           most of the time.  
20           ✓ To carry out diplomacy, such as pressuring the regime in Ethiopia to transition to democracy.  
21           ✓ To revolutionize science and technology, teaching, showing and experimenting how afflicted-citizens-  
22           centered, among others, software product management projects can be managed scientifically.  
23           ✓ To make Addis Abeba a truly self-administered city represented in the federal government.  
24           ✓ To give Addis Abeba back to Addis Abebians.  
25           ✓ Not just to influence, control, shape and determine, among others, the order of power, culture, business  
26           and industry, among others, alone but to rise to power, serve the amazing, afflicted, citizens of Ethiopia  
27           in the countryside and cities of Ethiopia and shape the world, among others, positively eventually.  
28           ✓ To shape the trillions of dollar worth economy, industry and politics, among others, along the Nile.  
29           ✓ Not just to influence, control, shape and determine the order of power, politics and culture in Africa  
30           but run Africa ultimately.  
31           ✓ Not just to influence, control, shape and determine the order of power, politics and culture in the world  
32           directly and indirectly but run the world ultimately.

## **Critical Issues: “What has been damaged?”**

94. While Facebook has been one of the enabling, supplementary, force, or tech, to meet the envisaged, key, strategic, objectives, its careless, or irresponsible, among others, conducts, which was inconsiderate of dependency, damaged reliance, value co-creation spheres, products, services, political causes, scientific research, indoctrinations, solutions and campaigns, among others, built, achieved and set to grow at scale, among others, to change, or impact, Addis Abeba, the nations and nationalities of Ethiopia, the future of Nile and the economy, industry, politics and culture, among others, of Ethiopia, among others. As a result, Meta's wrong actions damaged what was done regarding the future of the Nile, Ethiopia, Africa and the world, among others, socially, culturally, politically and scientifically, among others. Subsequently, the exponential, orthogonal, damages — which aren't as simple, replaceable, scalable and compensable, among others, as calculating the corresponding cost for compensating damages arising from dozens of sky scrapers in New York city, SF and Austin, among others, set ablaze by accidental fire, among others — are enormous not only to a private party, the plaintiff, but also to the public. For instance, the high-level, strategic, objectives iterated above — which transcends from personal, business and academic, among others, objectives to the meta-quest for democracy by over 100 millions — have all been jeopardized or damaged. Everything that was done, and put into the making, such as skill, time, motivation and momentum, knowledge, acumen, rigorous-readership, hard-to-find-and-earn-insider-intel, innovative-scientific-frameworks-for-meeting-the-need-of-affiliated-citizens and management-frameworks, among others, have been damaged. In addition, orthogonal exponential prospects, or visions, or pro-visions, which can only materialize premised on procedural milestones, have been damaged. Moreover, health damages, such as emotional distress, among others, resulted from the avoidable conduct of Meta.

95. For instance, if, and when, you're doing a restaurant business, your functional data elements are meals or forming and shaping thereof to hundreds of customers a day, if you're running a car manufacturing industry, your functional data elements are shaping cars or parts thereof, if you're running Amazon, your functional, business-data, elements are SAAS, PAAS and IAAS, among others. Given the high-stakes, and portfolios, among others, encompassed, when controlling, or randomizing, or shaping, among others, politics with unique ideas, opinions, innovations, researches, frameworks, interpretations and causes, among others, in an operational setting where the media landscape is dominated with similar opinions, which don't represent the silent majority of the oppressed and exploited people of Ethiopia — when you run, or manage, among others, well-validated, high-level, political products, or services, or leadership tactics and strategies, or causes, among others, shaping at high-level, your functional, business(operational or political)-data, elements are natural resources, people, organized actions, movements, supply-chains,

1 executive decisions, markets, industries, powers, economies(both micro and macro), futures and  
2 world, among others— you are operating as a political, social, economic, cultural and financial,  
3 among others, force. In this regard, due to the strikes, among others, what was vested, and all that  
4 could have been achieved discretely by several private and public, among others, interests  
5 discretely directly and indirectly, have been damaged intrinsically. What was put into the product,  
services and contents, among others, has been sabotaged by Meta.

6

7 96. The corresponding estimation of valuation for the high-risk skills, knowledges, competences,  
8 acumens and activities, among others, carried out is estimated to be [at least] 1-5 billion USD<sup>60</sup>.  
9 For instance, if we take aspects of acquiring critical intel/info alone, you can't acquire critical  
10 intel(info) to use as the raw materials of your services aimed at shaping at high-level just like that:  
11 “from setting up the mode of communication through managing the exchange to publicization,  
12 among others, the corresponding backend, or complex, procedural activity for what's presented in  
13 the frontend requires tremendous amount of resources. Meaning, there are lots of complex,  
14 resourceful, matters that can't be disclosed here which are, and have been, integral to delivering  
15 something radical, critical, unique and valuable, among others, converting one person at a time for  
16 years, despite the corresponding state of repression, among others, for even less critical political  
17 activities.”

18

19 97. Looking at some of the skills and acumens used, if we take some aspects of the contents alone, it  
20 usually takes a lot of reading and reflection, among others, before dropping few lines of unique  
21 contents, or reflections, among others, aimed at meeting unique goals, to convert one person at a  
22 time. The loyal user, or follower, bases in the corresponding pages which could have been, or were  
23 envisioned for becoming, a springboard for the next Disney-for-Democracy, among others, have  
24 been decimated. Instantly, Meta disabled, or abolished, not only a service, or product, among  
25 others, but a challenging cultural, or political, power, or brand, which was built one person,  
26 content, activity, research, research method, milestone, impact and impression, among others, at a  
27 time over a course of many years instantly.

28

29 98. Meta sabotaged a unique, or one of the few, rising political force, or power, or service, or product,  
30 or venture, or culture, or revolutionary scientific research, among others, which, defying the

---

27 60 Why are tech companies paying hundreds of millions USD to poach some type of AI programmers. It isn't because AI programming is more  
28 difficult than other types of programming. Instead, it's about supply and demand: “It's rare to find some types of gigs who had spent their precious  
time on doing one thing persistently on which others didn't do for years, even when the activity isn't risky politically. As a result, it will be, and is,  
hard that filling in, even by redirecting different types of programmers and engineers, immediately.” In this regard, the projected valuation for the  
chemistry of multi-disciplinary talent, or knowledge, or acumen, among others, used is in the range of billions of USD at least.

1 subsequent state of emergencies enacted by the Government of Ethiopia to deter and silence any  
2 form of criticism or opposition, shaped politics positively in a unique way in the best interest of  
3 the oppressed and exploited people of Ethiopia unceasingly. As the ultimate goal of the product,  
4 or service, among others, isn't limited to Addis Abeba and Ethiopia, Meta sabotaged a unique,  
5 rising, political force, or power, or service, or product, or venture, or culture, or scientific research,  
6 or order, among others, not only in Ethiopia, the Nile, Africa, the Middle East and Europe but in  
7 the world. Meta damaged the reputation of a person, ideas, product, services, political job and  
8 causes, among others. Meta interfered with, and shaped, the aforementioned objectives, among  
9 others, including politics, economy, culture and industries, among others, at high-level,  
strategically, in the shape, or mold, it wants, becoming an opposite party directly, violating its  
terms of service, operation and guidelines, among others, intrinsically.

10 99. Consequently, it is unfair Meta decided to shape, or control, against the pages, or research, or the  
11 strategic objectives of the product and services, or a person, or millions in quest for democracy,  
12 among others, becoming an opposite party directly and indirectly. For instance, controlling, or  
13 halting, the only pages which were running critical creatives(ads) opposing, exposing, showing,  
14 inspiring and teaching, among others, in a unique and scientific way, defying the regime's  
15 declaration of subsequent state of emergencies in a country of nearly 120 million, Meta  
16 randomized, or controlled, the much-needed, imperative, envisaged outcomes, objectives and  
17 results, among others, against several private, non-gov and public, among others, interests,  
holdings and futures, among others, intrinsically negatively.

18 100. Example of some of what was put into what was damaged by Meta exponentially orthogonally:  
19 "Even if we assume it's possible to fill all the skills and acumens utilized, such as business,  
20 marketing management, journalism, history and software engineering, among others, by paying  
21 different specialists, it is hard to find an Ethiopian willing to take the high-risk(due to the level of  
22 criticality of the activities) to accomplish even specific, supplementary, tasks designated<sup>61</sup>. In  
23 addition, the thoughts, interpretations, insights, innovations(unique, well-verified-and-well-  
24 validated, research and developments methods, among others) and cultural and historical acumens,  
25 among others, which enabled the corresponding pages, products, services and contents, among

---

26 <sup>61</sup> Why are tech companies paying hundreds of millions USD to poach some type of AI programmers. It isn't because  
27 AI programming is more difficult than other types of programming. Instead, it's about supply and demand. That it's rare  
28 to find some types of gigs who spend their time on doing one thing persistently for years, even when the activity isn't  
risky politically, it will be, and is, hard that filling in, even by redirecting different types of programmers and engineers,  
immediately. In this regard, the projected valuation for the multi-disciplinary talent, or knowledge, or acumen, among  
others, used in the risk venture is in the range of billions of USD at least.

1 others, to convert one person at a time and result in the desired impact[even with negative controls]  
2 would haven't been possible without the unique, multidisciplinary, mind well-suited for that  
3 problem, or cultural and political spheres, as propagated through the products, works, services,  
4 contents and activities, among others. As a result, no-one would have [and as a matter of fact did  
5 evidently] accomplished the same, unique, critical, social, political and entrepreneurship  
6 innovation and alternative empirical and rational treatments to the pressing public, economic,  
political and industrial, among others, crises faced by millions of afflicted citizens.”

7 101. Examples of tangible skills and acumens put alone: “Marketing management, business,  
8 product-management, software-engineering, history, language, culture, fine arts, religion,  
9 industries and scientific-and-research-methods, among others.” The most important question, how  
10 much does it cost to find somebody willing to perform in 1) high-risk roles 2) cable of delivering  
11 those acumens and skills, [at the same time] having the personal story, brand, to be accepted,  
12 resonate to and convert one person at a time in critical, or radical, political value co-creation  
13 spheres where arts, culture, politics, science, history, theology and business, among others, are  
14 applied? If it was possible to find somebody ideating and executing the same, critical,  
15 multidisciplinary, thoughts, actions, service and scientific research, among others, where were the  
16 relevant academia when people needed alternative forms of bypassing and upending suppression  
17 <sup>62</sup>?

18 102. For instance, what has already been damaged, and the cost for putting the knowledge, time,  
19 skill and effort, among others, vested to conduct afflicted-citizens-centered, innovative, cultural,  
20 political and technological product management research alone, precluding everything else for a  
21 moment, can be factored into considerations genuinely. Who is willing to conduct the afflicted-  
22 citizens-centered-research alone<sup>63</sup>? Who innovated regarding afflicted citizens in software product  
23 management for the first time in history? What was damaged by Meta — for instance, the  
24 scientific, afflicted-citizens-centered-software-product-manamgnet-research-and-innovation of  
25 Chewata with its academically, philosophically, morally, industrially, politically and culturally,  
26 among others, grounded anchors — had the potential to revolutionize the world as we may know

---

27 <sup>62</sup> Some types of AI programmers are the most expensive in the world right now. While you can replace one AI  
28 programmer with another, no matter how much you are willing to pay for, it isn't possible to find somebody ideating, and  
executing, the same multidisciplinary thoughts, actions, projects, innovations and services, among others, impacting  
millions, shaping the politics of a country and world. Meta controlled high-stake services, scientific researches and  
innovation, outcome and one of the most powerful game story of our time in the history of entertainment s negatively.

<sup>63</sup> Michael Argaw. The Product Management of Chewata, officially unpublished Msc thesis ([www.chewata.org/msc](http://www.chewata.org/msc))  
extracted from the case “Michael Argaw Vs Åbo Akademi University” filed in the district court of Turku, Finland on  
February 2025.

1 and see it. As a matter of fact, California isn't only the economic powerhouse of the US to date  
2 but also the politico-cultural powerhouse, or bastion, in which entertainment, such as Hollywood,  
3 and technology, among others, shaping the world, are concentrated. Meta's scandal is straight  
4 forward: "Meta went against the constitution, culture, values and reputation, among others, of  
5 California by supressing strategic services, or scientific researches, or products, or causes, or  
6 fictions, among others, harnessing the power of arts, culture, business and technology, among  
7 others, to deliver democracy to millions creatively, upending suppression, or tyranny,  
innovatively, scientifically, academically, artistically and technologically."

8 103. Consciously and unconsciously, Meta violated not only the human and democratic rights of a  
9 private party but also millions indirectly intrinsically strategically.

10 104. By forcing disclosure, Meta jeopardized the security, integrity and reputation, among others,  
11 of a private party.

12 105. By forcing disclosure, Meta distracted, inflated and undermined a private party.

13 106. By discriminating contents, Meta harmed private, public and non-gov parties, or interests, as  
14 well.

15 107. The moment Meta prevented, or undermined, the strategic decision supports, provisions and  
16 some of the informations, knowledges, instructions, corrections, [empirical and rational]theories,  
17 ideas, products and services, among others, set on Ethiopia by striking, or undermining, among  
18 others, in the manner stated in the complaint, Meta decided what political idea and agenda, around  
19 who, and where and how, among others, people are allowed to organize, among others, indirectly.

20 108. For instance, the page, Addis Abebe, which is, and has been, the leading page advocating for  
21 Addis Abebians, was keen on campaigning for the release of political prisoners and the  
22 unequivocal and immediate respect for the right of Addis Abebians to pursue an authentic self-  
23 administration. Now that the page (which has over 113K followers) is out of use jeopardized by  
24 Meta, the political stride of Addis Abebians is jeopardized significantly.

25 109. For instance, due to the interruption, the hard-to-build cells, files and ranks built overtime to  
26 gather and communicate important info alone have been jeopardized or exhausted.

1 110. The technical, social sciences and business, among others, rigorous learning curves needed to  
2 be met to supply input for what was in the making, and to come, subsequently, was damaged by  
3 Meta. Meaning, the process of bringing up what was damaged by Meta wasn't as simple as  
4 stopping, or damaging, everything done instantly but a long, risky and rigorous process.

5 111. Meta halted active, unique, non-violent, rare and hard-to-replicate-and-find, among others,  
6 political activities [which had sufficient momentum] capable of, or on course to achieve,  
7 undisclosed strategic, generational, political pro-visions [organized openly through social media,  
8 among others]. While the interferences may seem very easy for Meta, as simple as pressing a  
9 button, the instantaneous acts were critical to the state, development and future of several private,  
10 public and non-governmental interests directly and indirectly. For instance, the opposition political  
11 activity in Addis Abeba and Michael's ability to influence using social media has been  
12 intercepted for couple of years now. As a result, we are capturing damages on Michael lasting  
13 years, precluding damages to private, public and non-gov parties regarding the delay, or jeopardy,  
of the cause of the political advancement of the self-administration of Addis represented in the  
federal branches of the government of Ethiopia, among others.

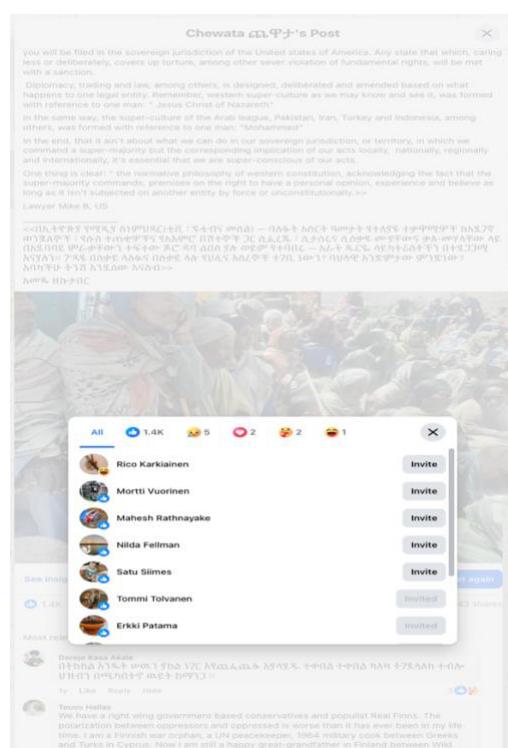

14 112. Different actors would like to control power and politics, among others, in Ethiopia because  
15 apart from the sovereign jurisdiction of the country, whoever is in power in Ethiopia 1) can shape  
16 the current world order, 2) shapes African Union and Africa, 3) would determine the future of  
17 Middle East, 4) shapes Europe, 5) shapes Russia, religion, culture and the balance of east-west  
18 power and 5) shapes relation between China and Africa, among others. As a result, why Meta  
19 controlled in the mold, or shape, it did unfairly by discriminating, or striking, the corresponding  
20 democratic contents, scientific researches, products and services, among others, in the manner  
deciphered in the complaint is questionable strategically intrinsically.

21 113. What Meta damaged is a product, or service, or research, or community, among others, which  
22 — surpassing organized political parties which can't express critical points due to repression,  
23 among others — made a unique history in contemporary Ethiopian politics. Is it possible the  
24 investors, or, may be, corruption by its employees, influenced Meta to counter the democratization  
25 of Ethiopia? It remains to be deliberated coming up.

26  
27  
28

1 **H. Meta's Product chemistry: "Doing away with normative principles of product**  
2 **management, user centricism, among others, Meta platforms failed to**  
3 **implement simple features which could power, or align, users of Facebook to an**  
4 **enhanced strategic positioning or better outcome.**

5 114. For instance, Chewata's post in Figure 19 enjoyed over 1.4k likes. If the manager of the page  
6 would like to invite those who liked the post to like, or follow, the corresponding page, he, or she,  
7 has to invite one person at a time. Positioning content creators, or businesses, or product owners,  
8 among others, in advantageous, strategic and organically prosperous value co-creation sphere,  
9 Meta could have implemented a simple feature which enables the invitation of all who have yet  
10 got to follow, or like, the page to follow, or like, the page at once in one button as opposed to the  
11 need for inviting one person at a time, giving users, or customers, an unpleasant, or cumbersome,  
12 test, or experience, of product chemistry<sup>64</sup>.

23 Figure 19: A picture showing a post and users pending to be invited.  
24

25 <sup>64</sup> By product chemistry — which is a new product experience concept by the plaintiff where new NGOs specializing on  
26 advocating for enhancing the features of software products by overriding disadvantageous, or value co-destructive, or  
27 cumbersome, among others, elements, compounds and mixtures in the features, or epics, or value propositions, among  
28 others, of a software product by customer(or user)-centrically experimenting with prosperous elements, compounds and  
mixtures supporting organic growth instantly instead — the plaintiff underscores the importance of ensuring the product  
provides as much pleasant, valuable, usable and organically prosperous, among others, experience as possible to the user,  
or customer, avoiding strategically cumbersome, or harmful, elements and feature(navigation) combinatorics which make  
the product more user-unfriendly and less-organically-prosperous(efficacious) unfairly or strategically.

1 **I. Meta Platforms suppressed the live-streams from Michael's personal page,**  
2 **among others, repeatedly.**

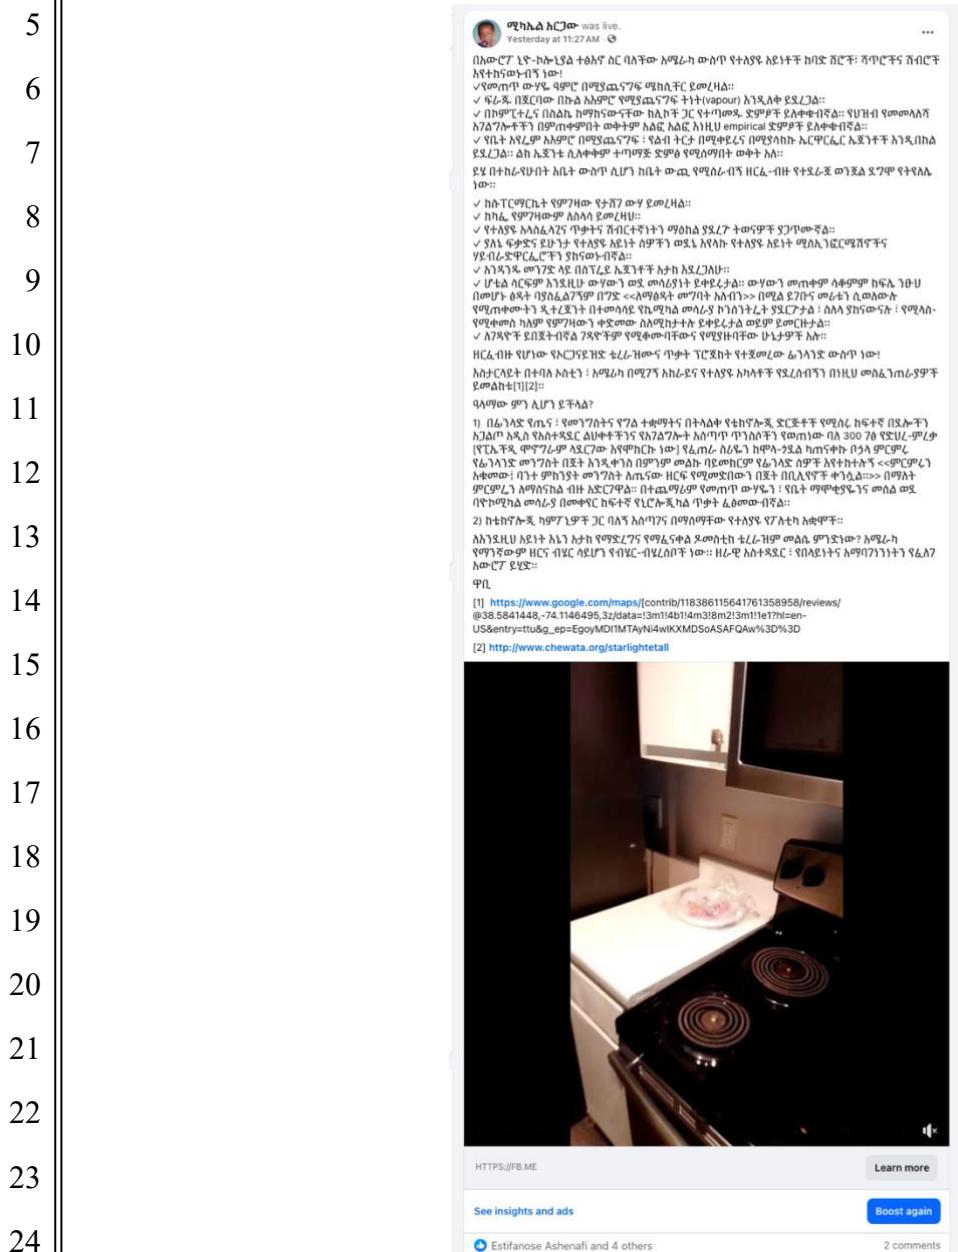

Figure 20: A picture showing a post and users pending to be invited.

115. In translating the aforementioned post, we get the following:

1 116. Translation starts below.

2 117. Different types of terrorisms, sabotages and set-ups, among others, are unfolding on me in the  
3 US.

4 118. My drinking water supply gets interfered with chemicals aimed at sabotaging me emotionally,  
5 psychiatrically and physically, among others<sup>65</sup>.

6 119. The ventilator of the refrigerator, which inputs, or receives, a water diluted with psychoactive  
7 chemicals releases psychoactive vapour.

8 120. Sounds coherent with my private activities on my connected mobile and mac devices get  
9 released from outside of my unit.

10 121. The home air system gets interfered with mind and emotion sabotaging and heart-rate altering,  
11 among others, types of chemicals. There are times when sounds will be made when the harmful  
12 air warfare agent, or biochemical, is released.

13 122. In addition, lots of things happened to me outside.

14 123. There are times when even the bottled water which I bought from the supermarket has been  
15 diluted with harmful chemicals in different occasions<sup>66</sup>

16 124. The diet cock which I bought from couple of cafés in different occasions were poisoned with  
17 mind-debilitating drugs intended to undermine me emotionally, psychiatrically and intellectual,  
18 among others, temporarily and permanently.

19 125. I have been encountered with unwanted, intimidating, acts time and again, violating my data  
20 protection.

21 126. I have been attacked with spray-agents by contaminating the air I may encounter ahead of me.

---

22  
23  
24  
25  
26  
27  
28  
<sup>65</sup> <http://www.chewata.org/starlightetall>

There are circumstances where the package of bottled water which I bought from Target and H.E.B would be contaminated with psychoactive chemicals. In addition, in an outright discrimination, or civil-rights violations, the contaminated bottled water would be carried away after I left the supermarket.

1

2 127. In most of the hotels and apartments I put up in the US, the water and air system would be  
3 tampered for carrying out bio-chemical attacks on my mind or nervous system. There are occasions  
4 where even when I said, “The hotel room is clean. As a result, I don’t need housekeeping,” they  
5 would insist on entering the room for cleaning, mob the clean-floor with detergents diluted with  
emotional-state changing chemicals.

6

7 128. The multi-dimensional domestic terrorism started in Finland in large scale on Sep 2023. Before  
that it happened once in a while.

8

9 129. What could be the objective of the strategic attacks, or terrorisms, on me?

10

11 130. For instance, the biochemical attack could be aimed at inhibiting my ability to fight  
12 intellectually, so far up to disabling my brain, while countering my research[which, exposing  
13 years of severe human rights violations by several entities in Finland and tech(which from  
14 supressing my afflicted-citizens-centred research, innovation, product, service and political  
activity, among others, to introduce democracy in Ethiopia to different negative controls),  
15 produced new, innovative, service model canvases in a 300 page academic work<sup>67 68]</sup> through a  
16 weak hybrid strategy. In addition, it could be aimed at sabotaging and undermining me, my  
17 activities and country politically, among others, to make money, or limit liability, or protect  
interest, among others, by all means necessary.

18

19 131. My response to such type of domestic terrorism: “America doesn’t belong to any race, or  
20 ethnicity, but different ethnicities. If you want a tribal, or ethnic-dominated, administration system,  
then you have to go to Europe.”

21

22 132. Translation ends here

23

24 133. That Meta platforms suppressed the post above, I was forced to promote it. Meaning, I can’t  
25 promote strategic injustices happening on me aimed at not only jeopardizing my basic political  
activities and wellbeing but also the political and economic, among others, future of millions of  
26 people organically.

27

## PRAYER FOR RELIEF

135. Wherefore the plaintiff pray for judgment against the defendants as follows:

1. For a money, judgment, representing compensatory damages for exponential losses of vested equity, time and money, including disparagement, undermination and interruption of a cultural tech innovation and organic and inorganic reach centered political, academic and business activity.
2. For a money judgment for years of emotional distress.
3. For costs of suit and attorney (or representative) fees if and where applicable.
4. For prejudgment and post-judgment interest.
5. For any other relief that this court consider just and proper intrinsically.
6. For any relief, or compensation, Meta Platforms Inc, or Facebook, Or Meta, or its CEO, or executive team, among others, (with, or without, contrite public, or private, confession) consider just and proper though not expressly presented to the court by the plaintiff.
